#### **RISK APPETITE FRAMEWORK**

The Bank's risk appetite is defined as the level of risk the Bank is willing to take, having regard to its resources and financial capacity, strategic objectives and regulatory constraints (e.g. capital and liquidity requirements), with the expectation that the risk taken or to be pursued is sufficiently compensated or at acceptable return with reasonable confidence level. Against this background, the risk appetite framework is comprised of a Risk Appetite Statement ("RAS") and a set of risk tolerance is established. The RAS covers five key dimensions of the risks and returns of the Bank, namely the target returns to shareholders, earnings volatility, solvency, liquidity and others while more granular risk types including credit risk, market risk, liquidity risk, interest rate risk and other less quantifiable risks (e.g. operational risk, reputation risk, strategic risk, cyber risk, legal risk and conduct risk, etc.) are controlled under different risk limits and risk mitigation measures that constitute the risk tolerance of the Bank.

The RAS is a high level statement which sets out the risk-return requirements as well as the risk taking capacity of the Bank, taking into account its financial and capital strength and covers a wide range of metrics including return on average shareholders' funds, liquidity maintenance ratio, core funding ratio, leverage ratio and measures of impact on profitability and capital adequacy ratio under selected stress scenarios, etc. Moreover, to ensure that the Bank's operations and risk taking activities are in line with the RAS, the Bank has adopted a set of risk tolerance levels to govern and control specific categories of risk, which is made up of major quantitative risk limits as well as some qualitative measures.

#### 風險偏好框架(續)

就制定風險偏好過程而言,董事會根據本銀行資金、風險狀況及策略釐定最佳風險偏好。此外,董事會負責監察本銀行風險偏好的發展及監控,以確保本銀行於實現其業務策略之時需關注持續略及營運環境發生重大變化,否則風險偏好闡留。此外,於風險偏好闡明框架之年度及其他中長期計與本銀行業務策略、風險及口豐時,於風險偏好闡明框架之年度及其地特別審查期間,為進行全企業範圍之壓力測試,本銀行已設定涵蓋全球經濟不同發展過程之風險時,包括高壓情景。其結果連同監管發展將被視為風險偏好審查之關鍵考慮因素之一。

風險偏好闡明及風險容忍度之遵守情況乃受持續 監察,並按季度分別向董事會和風險管理及合規 委員會報告,以確保本銀行業務於風險偏好框架 規定範圍內進行。此外,於本銀行每年審閱及批 准其年度預算及中期計劃,或審批新業務及風險 策略時,風險管理及合規委員會以及董事會將對 風險偏好框架及主要風險偏好限額進行審查。

#### RISK APPETITE FRAMEWORK (Continued)

As for the process of risk appetite setting, the Board determines the optimal risk appetite having regard to the Bank's capital, risk profile and strategy. In addition, the Board is responsible for overseeing the development and monitoring of the Bank's risk appetite to ensure that the Bank is able to achieve sustainable growth in pursuing its business strategy, operating within its tolerance levels. The RAS is designed to be consistent with the Bank's business strategy, risk and return balance and market outlook, for the medium to longer term and it is not intended to be changed frequently, unless there are significant changes in the Bank's strategy and operating environment. Furthermore, during the annual and other ad hoc reviews of the RAS framework, risk scenarios covering different courses of development of the global economies including highly stressed scenarios are developed for the purpose of conducting the firm-wide stress test. The results together with regulatory developments will be taken as one of the key considerations in the review of risk appetite.

Compliance with the RAS and risk tolerance is monitored and reported to the Board and the RMCC respectively on a quarterly basis to ensure that the businesses of the Bank are conducted within the requirements of the risk appetite framework. Moreover, the risk appetite framework and major risk appetite limits are subject to the review by the RMCC and the Board on an annual basis, when the annual budget and medium term plan of the Bank are reviewed and approved, or new business and risk strategies are to be approved.

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.1 Basis of preparation (Continued)

The preparation of consolidated financial statements in conformity with HKFRSs requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in applying the Group's accounting policies. Changes in assumptions may have a significant impact on the consolidated financial statements in the period the assumptions change. Management believes that the underlying assumptions are appropriate and that the consolidated financial statements therefore present the financial position and results fairly. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 4.

There are no HKFRSs or interpretations that are effective from 1 January 2022 or not yet effective that would be expected to have a material impact on the Group.

#### 2.2 Consolidation

The consolidated financial statements include the financial statements of the Bank and all its subsidiaries made up to 31 December.

#### (a) Subsidiaries

A subsidiary is an entity (including a structured entity) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

#### 2.2 綜合財務報表(續)

#### (甲) 附屬公司(續)

本集團以收購會計法為本集團之業務合併列 賬。收購一間附屬公司所付出之代價為已轉 移資產、承擔之負債及本集團發行之權益之 公平值。所付出代價包括任何或然代價安排 之資產或負債之公平值。收購相關之費用於 產生時支銷。在業務合併過程中取得所收購 可被認明資產及承擔之負債及或然負債,均 於收購當日按其公平值作出初始計量。本集 團根據逐項收購基準按公平值或按沒控制權 股東應佔被收購者資產淨值之比例確認任何 被收購者之沒控制權股東權益。

所付出之代價、任何沒控制權股東於被收購者權益以及在收購日期於被收購者權益之公平值超出本集團應佔所收購可被認明淨資產之公平值,將列賬為商譽。如轉讓代價、確認之非控股權益及過往所持權益計算之總額在優惠價格收購中低於所收購附屬公司淨資產的公平值,其差額將直接在綜合全面收益賬內確認。

集團內公司間之交易、結餘及未變現交易收 益已予抵銷。除非交易提供轉移資產減值之 證明,未變現虧損亦予以抵銷。附屬公司之 會計政策已作必要之變更以確保與本集團採 納之政策一致。

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.2 Consolidation (Continued)

#### (a) Subsidiaries (Continued)

The acquisition method of accounting is used to account for business combinations by the Group. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the Group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the total of consideration transferred, non-controlling interest recognised and previously held interest measured is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in the consolidated statement of comprehensive income.

Inter-company transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

Impairment testing of the investments in subsidiaries is required upon receiving a dividend from these investments if the dividend exceeds the total comprehensive income of the subsidiary in the period the dividend is declared or if the carrying amount of the investment in the separate financial statements exceeds the carrying amount in the consolidated financial statements of the investee's net assets including goodwill.

#### 2.2 綜合財務報表(續)

#### (乙) 與沒控制權股東之交易

本集團把與沒控制權股東之交易視為與本銀 行股本持有人之交易。在向沒控制權股東權 益作出之收購中,任何已付代價與收購附屬 公司有關股權之淨資產賬面值之差額於權益 賬確認。向沒控制權股東權益出售之收益或 虧損亦於權益賬確認。

倘本集團對該實體失去控制權,任何保留權 益將被重新計量至其公平值,賬面值之變動 於損益賬確認。日後對該保留權益作聯營公 司、共同控制實體或金融資產的會計處理 時,上述之公平值視為初始賬面值。此外, 任何就該實體曾確認為其他全面收益之數額 當作本集團直接出售有關資產或負債處理, 這代表曾確認為其他全面收益之數額將重新 分類至損益賬。

#### (丙) 聯營公司

聯營公司是指本集團可對其發揮重大影響但不能控制的公司。聯營公司投資以權益會計法處理,最初按成本入賬。本集團之聯營公司投資包括收購時認明之商譽(扣除任何累計減值虧損)。

本集團應佔聯營公司收購後的溢利或虧損在 綜合收益賬中確認,本集團應佔其在收購後 儲備的變化在本集團的儲備確認。投資的賬 面值按累計收購後的變化作調整。除非本集 團有為聯營公司提供責任承擔或支款,否則 當本集團應佔聯營公司的虧損達至或超過本 集團在聯營公司的權益(包括其他無抵押應 收款)時,本集團不再確認額外的虧損。

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.2 Consolidation (Continued)

#### (b) Transactions with non-controlling interests

The Group treats transactions with non-controlling interests as transactions with equity holders of the Bank. For purchases from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

When the Group ceases to have control, any retained interest in the entity is remeasured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

#### (c) Associates

Associates are all entities over which the Group has significant influence but not control. Investments in associates are accounted for using the equity method of accounting and are initially recognised at cost. The Group's investment in an associate includes goodwill (net of any accumulated impairment loss) identified on acquisition.

The Group's share of its associates' post-acquisition profits or losses is recognised in the consolidated income statement, and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associates.

#### 2.2 綜合財務報表(續)

#### (丙) 聯營公司(續)

本集團會於各報告期確定聯營公司投資已減值之客觀證據存在與否。倘情況屬實,本集團按聯營公司可回收金額及其賬面值之差額計算減值金額及緊接「應佔聯營公司之業績」確認於綜合收益賬。

本集團與其聯營公司間交易之未變現收益按 本集團應佔聯營公司權益的份額予以抵銷。 除非該交易提供轉移資產減值之證明,未變 現虧損亦予以抵銷。聯營公司之會計政策已 作必要之修正以確保與本集團採納之政策一 致。

在聯營公司之攤薄收益及虧損在綜合收益賬內確認。

在本銀行之財務狀況表內,聯營公司投資是 按成本扣除減值撥備列賬。本銀行對聯營公 司業績的會計處理是按已收取及應收之股息 入賬。

#### (丁) 共同控制實體

共同控制實體指本集團與其他人士以合約協議方式共同進行經濟活動,該活動受合營各方共同控制,任何一方均沒有單一之控制權。

共同控制實體之業績、資產及負債按權益會 計法入賬。綜合收益賬包括本集團應佔共同 控制實體是年度業績,而綜合財務狀況表則 包括本集團應佔共同控制實體之資產淨值。

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.2 Consolidation (Continued)

#### (c) Associates (Continued)

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognises the amount adjacent to "share of results of an associate" in the consolidated income statement.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

Dilution gains and losses in associate are recognised in the consolidated income statement.

In the Bank's statement of financial position, the investments in associates are stated at cost less provision for impairment losses. The results of associates are accounted for by the Bank on the basis of dividends received and receivable.

### (d) Jointly controlled entities

A joint venture is a contractual arrangement whereby the Group and other parties undertake an economic activity, which is subject to joint control and none of the participating parties has unilateral control over the economic activity.

The results and assets and liabilities of jointly controlled entities are accounted for using equity method of accounting. The consolidated income statement includes the Group's share of the results of jointly controlled entities for the year, and the consolidated statement of financial position includes the Group's share of the net assets of the jointly controlled entities.

#### 2. 主要會計政策概要(續)

#### 2.3 利息收入及支出

所有按攤餘成本及以公平值計量且其變動計入其 他全面收益計量之債務工具的利息收入及支出乃 應用實際利率法確認於綜合收益賬內。

實際利率法乃是一種用以計算金融資產或金融負債之攤餘成本及其於相關期內攤分利息收入或利息支出的方法。實際利率指可將金融工具在預計有效期間或較短期間(如適用)內之估計未來現金收支貼現為該金融資產或金融負債之賬面淨值之適用貼現率。在計算實際利率時,本集團按金融工具之所有合約條款(如提早清還之行使權)而估計其現金流量,但不考慮未發生之信貸損失。此計算包括所有合約內交易雙方所收取或支付能構成整體實際利息之費用及利率差價、交易成本及所有其他溢價或折讓。

若一項金融資產或一組金融資產的價值因減值虧 損被調低,其利息收入則按計算有關減值虧損時 所應用以貼現未來現金流量之利率來計量確認。

### 2.4 服務費及佣金收入及支出

來自客戶合約之服務費及佣金收入按客戶合約內 列明之代價計量。本集團於客戶取得服務之控制 權時確認收入。

在較長期間內持續提供不間斷之賬戶管理、託管 服務等之服務費及其他服務費於服務期間按系統 化基準確認。

有關交易性之安排(例如兑換、經紀服務及入口或出口服務)之收入於交易發生時確認。

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.3 Interest income and expense

Interest income and expense are recognised in the consolidated income statement for all debt instruments measured at amortised cost and fair value through other comprehensive income using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument (for example, prepayment options) but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

#### 2.4 Fee and commission income and expense

Fee and commission income from contracts with customers is measured based on the consideration specified in a contract with a customer. The Group recognises revenue when it transfers control over a service to a customer

Fees for ongoing account management, custody services and other servicing fees that are continuously provided over an extended period of time are recognised on systematic basis over the period the service is provided.

Revenue related to transaction-based arrangements such as interchange, broking services and import or export services is recognised at the point in time when the transaction takes place.

### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(以港幣千元位列示) (Expressed in thousands of Hong Kong dollars)

#### 2. 主要會計政策概要(續)

#### 2.5 股息收入

#### 2.6 金融資產及負債

#### 計量方法

#### 攤餘成本及實際利率

攤餘成本乃金融資產及負債於初始確認時之計量 金額,減去本金還款,加上或減去累計攤銷(就初 始金額及到期金額間差額採用實際利率法)及就金 融資產而言,調整任何虧損準備。

實際利率指可將金融資產或金融負債在其預計使用期內之估計未來現金收支貼現為該金融資產之賬面總值(即其扣除任何減值準備前之攤餘成本)或金融負債之攤餘成本之適用貼現率。該計算並無顧及預期信貸虧損及包含了能構成整體實際利息之交易成本、溢價或折讓及收取或支付之利率差價,例如發行費。對於購入或源生之信貸減值金融資產(為於初始確認時已是信貸減值之金融資產),本集團計算經信貸調整之實際利率,其按金融資產之攤餘成本而非賬面總值及計入預期信貸虧損對估計未來現金流之影響而計算。

當本集團修訂未來現金流之估計數值時,金融資產或金融負債之各自賬面值乃就採用原實際利率貼現新估計數值而調整。任何變動於收益賬內確認。

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.5 Dividend income

Dividends are recognised in the consolidated income statement when the Group's right to receive payment is established.

#### 2.6 Financial assets and liabilities

#### Measurement methods

#### Amortised cost and effective interest rate

The amortised cost is the amount at which the financial asset or financial liability is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset (i.e. its amortised cost before any impairment allowance) or to the amortised cost of a financial liability. The calculation does not consider expected credit losses and includes transaction costs, premiums or discounts and fees and points paid or received that are integral to the effective interest rate, such as origination fees. For purchased or originated credit-impaired financial assets (assets that are credit-impaired at initial recognition) the Group calculates the credit-adjusted effective interest rate, which is calculated based on the amortised cost of the financial asset instead of its gross carrying amount and incorporates the impact of expected credit losses in estimated future cash flows.

When the Group revises the estimates of future cash flows, the carrying amount of the respective financial asset or financial liability is adjusted to reflect the new estimate discounted using the original effective interest rate. Any changes are recognised in profit or loss.

金融資產及金融負債於機構成為工具之合約條款中之一方時確認。慣常之金融資產買賣於交易日 (本集團承諾買賣該資產之日期)確認。

於初始確認時,本集團計量金融資產或金融負債時按公平值加上或減去交易成本(就非以公平值計量且其變動計入損益的金融資產或金融負債而言),其為購入或發行該金融資產或金融負債時的新增或直接歸屬於該等交易之成本(例如服務費及佣金)。以公平值計量且其變動計入損益之金融資產及金融負債之交易成本於收益賬內支銷。緊接初始確認後,就以攤餘成本計量之金融資產及以公平值計量且其變動計入其他全面收益之債務工具投資確認預期信貸虧損(「預期信貸虧損」)準備,其引致就新源生資產確認會計虧損於收益賬。

當金融資產及負債之公平值有別於於初始確認時 之交易價格,本集團確認該差額如下:

- (甲) 當相同資產或負債之公平值可由於活躍市場 之報價(即第1級別數據)或只使用可觀察市 場之數據按估值方法中提供證據,差額確認 為收益或虧損。
- (乙)於其他情況,差額將會遞延及按個別情況釐 定其初始損益之遞延確認時間。差額於工具 之可用年期內攤銷,或遞延直至工具之公平 值可採用市場之可觀察數據釐定,或透過結 算變現。

#### Measurement methods (Continued)

#### Initial recognition and measurement

Financial assets and financial liabilities are recognised when the entity becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset.

At initial recognition, the Group measures a financial asset or financial liability at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are incremental and directly attributable to the acquisition or issue of the financial asset or financial liability, such as fees and commissions. Transaction costs of financial assets and financial liabilities carried at fair value through profit or loss are expensed in profit or loss. Immediately after initial recognition, an expected credit loss ("ECL") allowance is recognised for financial assets measured at amortised cost and investments in debt instruments measured at FVOCI which results in an accounting loss being recognised in profit or loss when an asset is newly originated.

When the fair value of financial assets and liabilities differs from the transaction price on initial recognition, the Group recognises the difference as follows:

- (a) When the fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e. a Level 1 input) or based on a valuation technique that uses only data from observable markets, the difference is recognised as a gain or loss.
- (b) In all other cases, the difference is deferred and the timing of recognition of deferred day one profit or loss is determined individually. It is either amortised over the life of the instrument, deferred until the instrument's fair value can be determined using market observable inputs, or realised through settlement.

The Group classifies its financial assets in the following measurement categories:

- Fair value through profit or loss (including held for trading);

The classification requirements for debt and equity instruments are described below:

#### Debt instruments

Debt instruments are those instruments that meet the definition of a financial liability from the issuer's perspective, such as loans, government and corporate bonds and trade receivables purchased from clients in factoring arrangements.

Classification and subsequent measurement of debt instruments depend on:

- the Group's business model for managing the asset; and
- the cash flow characteristics of the asset.

Debt instruments (Continued)

Based on these factors, the Group classifies its debt instruments into one of the following three measurement categories:

- Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest ("SPPI"), and that are not designated at fair value through profit or loss ("FVPL"), are measured at amortised cost. The carrying amount of these assets is adjusted by any ECL allowance recognised and measured as described in section (ii) below. Interest income from these financial assets is calculated using the effective interest rate method.
- FVOCI: Financial assets that are held for collection of contractual cash flows and for selling the assets, where the assets' cash flows represent SPPI, and that are not designated at FVPL, are measured at FVOCI. Movements in the carrying amount are taken through other comprehensive income ("OCI"), except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses on the instrument's amortised cost which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss. Interest income from these financial assets is calculated using the effective interest rate method.
- FVPL: Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL and is not part of a hedging relationship is recognised in profit or loss and presented in the consolidated income statement in the period in which it arises.

業務模式:業務模式反映本集團如何管理資 產以產生現金流。即本集團之目標是否純屬 從該資產收取合約現金流或收取合約現金流 兼從出售該資產中收取現金流。倘若兩者皆 不適用(如金融資產乃持作買賣用途),則分 類該金融資產為「其他」業務模式之一部份及 按以公平值計量且其變動計入損益計量。本 集團就一組資產釐定業務模式時考慮之因素 包括過往之經驗於:如何從該等資產收取合 約現金流、如何評估該等資產之表現及呈報 予重要管理人員、如何評估和管理風險及如 何酬報管理人員。持作買賣用途之證券主要 為持作短期買賣用途或一併管理之金融工具 組合之一部份(其有證據顯示近期作短期獲 利之真實模式)。該等證券則分類至「其他」 業務模式內及按以公平值計量且其變動計入 損益計量。

純屬本金及利息之償付:倘業務模式為持有資產以收取合約現金流或以收取合約現金流或以收取合約現金流及出售,本集團會評估金融工具之現金流是否代表純屬本金及利息之償付(「純屬本金及利息之償付測試」)。在進行評估時,本集團會考慮合約現金流與基本借貸安排是否一致,即利息只包含金錢的時間價值、信貸風險、其他基本借貸風險及利潤率之考慮與基本借貸安排一致之風險承擔或波幅,相關金融資產會按以公平值計量且其變動計入損益分類及計量。

Business model: the business model reflects how the Group manages the assets in order to generate cash flows. That is, whether the Group's objective is solely to collect the contractual cash flows from the assets or is to collect both the contractual cash flows and cash flows arising from the sale of assets. If neither of these is applicable (e.g. financial assets are held for trading purposes), then the financial assets are classified as part of "other" business model and measured at FVPL. Factors considered by the Group in determining the business model for a group of assets include past experience on how the cash flows for these assets were collected, how the asset's performance is evaluated and reported to key management personnel, how risks are assessed and managed and how managers are compensated. Securities held for trading are held principally for the purpose of selling in the near term or are part of a portfolio of financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profittaking. These securities are classified in the "other" business model and measured at FVPL.

SPPI: Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell, the Group assesses whether the financial instruments' cash flows represent solely payments of principal and interest (the "SPPI test"). In making this assessment, the Group considers whether the contractual cash flows are consistent with a basic lending arrangement (i.e. interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement). Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at FVPL.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are SPPI.

權益性工具為以發行人觀點而言符合定義為權益性之工具:即不含有償付之合同責任,及可證明應佔發行人資產淨值剩餘權益之工具。權益性工具之例子包括基本的普通股股份。

除本集團於初始確認時已選擇不可撤回地指定該權益性投資為以公平值計量且其變動計入其他全面收益外,本集團往後按以公平值計量且其變動計入損益計量所有權益性工具。倘應用該選擇,公平值之收益及虧損於其他全面收益確認及其後不會重新分類至收益賬(包括於出售時)。當股息代表該等投資之回報時,其於本集團收取付款之權利獲確立時繼續於收益賬中確認為其他收入。

Debt instruments (Continued)

The Group reclassifies debt investments when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be very infrequent and none occurred during the period.

#### Equity instruments

Equity instruments are instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets. Examples of equity instruments include basic ordinary shares.

The Group subsequently measures all equity investments at fair value through profit or loss, except where the Group's management has elected, at initial recognition, to irrevocably designate an equity investment at fair value through other comprehensive income. When this election is used, fair value gains and losses are recognised in OCI and are not subsequently reclassified to profit or loss, including on disposal. Dividends, when representing a return on such investments, continue to be recognised in profit or loss as other income when the Group's right to receive payment is established.

Gains and losses on equity investments at FVPL are included in the "Net trading income" in the consolidated income statement.

#### (ii) Impairment

The Group assesses on a forward-looking basis the ECL associated with its debt instrument assets carried at amortised cost and FVOCI and with the exposures arising from loans to customers, loan commitments and financial guarantee contracts. The Group recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

Impairment allowance of financial assets measured at amortised cost is presented as a deduction from the gross carrying amount of the assets. Impairment allowance of loan commitments and financial guarantee contracts is recognised as a provision as part of "Other accounts and accruals". The carrying amount of debt instruments measured at FVOCI is their fair value. Their impairment allowance is recognised as part of "Investment revaluation reserve".

Note 3.2.2 provides more details of how the ECL allowance is measured.

#### (iii) 貸款修改

本集團有時重新協商或以其他方式修改客戶貸款之合約現金流。倘若此發生時,本集團會評估新條款是否與原條款有重大差異。本 集團就此會考慮下列因素:

- 倘借款人陷於財務困境,修改是否只 是降低合約現金流至借款人預期有能 力償還的金額。
- 有否加入任何重大的新條款,例如重 大地影響貸款風險面貌的利潤分享/ 以股權為基礎之回報。
- 當借款人未陷於財務困境時重大地延 長貸款期限。
- 利率之重大變更。
- 貸款的結算貨幣之變更。
- 加入之抵押品、其他擔保物或為增強 信貸所提供的保障重大地影響貸款之 相關信貸風險。

倘條款有重大差異,本集團則撤銷確認原有金融資產及以公平值確認「新」資產和重新計算該資產之新實際利率。故此重新協商日被視為初始確認日期以作計算減值用途,包括用以釐定信貸風險是否大幅增加。然而,本集團亦評估已確認之新金融資產是否於初始確認時被視作信貸減值資產,尤其是在債務人未能按原有協定支付款項而促使重新協商的情況下。賬面值之差額亦會於撤銷確認時在收益賬中確認為收益或虧損。

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.6 Financial assets and liabilities (Continued)

#### Financial assets (Continued)

#### (iii) Modification of loans

The Group sometimes renegotiates or otherwise modifies the contractual cash flows of loans to customers. When this happens, the Group assesses whether or not the new terms are substantially different to the original terms. The Group does this by considering, among others, the following factors:

- If the borrower is in financial difficulty, whether the modification merely reduces the contractual cash flows to amounts the borrower is expected to be able to pay.
- Whether any substantial new terms are introduced, such as a profit share/equity-based return that substantially affects the risk profile of the loan.
- Significant extension of the loan term when the borrower is not in financial difficulty.
- Significant change in the interest rate.
- Change in the currency the loan is denominated in.
- Insertion of collateral, other security or credit enhancements that significantly affect the credit risk associated with the loan.

If the terms are substantially different, the Group derecognises the original financial asset and recognises a "new" asset at fair value and recalculates a new effective interest rate for the asset. The date of renegotiation is consequently considered to be the date of initial recognition for impairment calculation purposes, including for the purpose of determining whether a significant increase in credit risk has occurred. However, the Group also assesses whether the new financial asset recognised is deemed to be credit-impaired at initial recognition, especially in circumstances where the renegotiation was driven by the debtor being unable to make the originally agreed payments. Differences in the carrying amount are also recognised in profit or loss as a gain or loss on derecognition.

倘條款未有重大差異,重新協商或修改不會 引致撤銷確認,及本集團按金融資產經修訂 之現金流重新計算賬面總值,並於收益賬確 認修改之收益或虧損。新賬面總值乃按原有 實際利率(或購入或源生的信貸減值金融資 產經信貸調整之實際利率)貼現經修改之現 金流作重新計算。

#### (iv) 除修改外之撤銷確認

當本集團於若干交易中保留從資產收取現金 流的合約權利但承擔了支付該等現金流予其 他機構的合約責任及重大地轉讓所有風險及 回報,該等交易會按引致撤銷確認之「通過」 轉讓處理,倘若本集團:

- 除非已從資產中收取相等金額,否則 並無支付款項之責任;
- 被禁止出售或抵押資產;及
- 有責任在無重大拖延下匯出收取自資 產之任何現金。

#### 2.6 Financial assets and liabilities (Continued)

#### Financial assets (Continued)

#### (iii) Modification of loans (Continued)

If the terms are not substantially different, the renegotiation or modification does not result in derecognition, and the Group recalculates the gross carrying amount based on the revised cash flows of the financial asset and recognises a modification gain or loss in profit or loss. The new gross carrying amount is recalculated by discounting the modified cash flows at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets).

#### (iv) Derecognition other than on a modification

Financial assets, or a portion thereof, are derecognised when the contractual rights to receive the cash flows from the assets have expired, or when they have been transferred and either (i) the Group transfers substantially all the risks and rewards of ownership, or (ii) the Group neither transfers nor retains substantially all the risks and rewards of ownership and the Group has not retained control.

The Group enters into transactions where it retains the contractual rights to receive cash flows from assets but assumes a contractual obligation to pay those cash flows to other entities and transfers substantially all of the risks and rewards. These transactions are accounted for as "pass through" transfers that result in derecognition if the Group:

- Has no obligation to make payments unless it collects equivalent amounts from the assets;
- Is prohibited from selling or pledging the assets; and
- Has an obligation to remit any cash it collects from the assets without material delay.

倘從資產收取現金流之合約權利已轉讓,和 本集團未轉讓或保留大部份風險和回報,及 本集團保留了轉讓資產之控制權,則本集團 採用持續參與法。

按此方法,本集團在持續參與的範圍內繼續確認該轉讓之資產及確認相關負債,以反映本集團保留之權利及責任。轉讓之資產及相關負債之賬面淨值為:(甲)本集團保留之權利及責任的攤餘成本(倘轉讓之資產按攤餘成本計量);或(乙)相等於本集團保留之權利及責任按單獨基準下計量的公平值(倘轉讓之資產按公平值計量)。

#### 2.6 Financial assets and liabilities (Continued)

#### Financial assets (Continued)

### (iv) Derecognition other than on a modification (Continued)

Collateral (shares and bonds) furnished by the Group under standard repurchase agreements and securities lending and borrowing transactions are not derecognised because the Group retains substantially all the risks and rewards on the basis of the predetermined repurchase price, and the criteria for derecognition are therefore not met. This also applies to certain securitisation transactions in which the Group retains a subordinated residual interest.

When the contractual rights to receive the cash flows from the assets have been transferred, and the Group neither transfers nor retains substantially all the risks and rewards of ownership, and the Group has retained control of the transferred assets, the Group applies continuing involvement approach.

Under this approach, the Group continues to recognise the transferred asset to the extent of its continuing involvement and recognise the associated liability, to reflect the rights and obligations retained by the Group. The net carrying amount of the transferred asset and associated liability is: (a) the amortised cost of the rights and obligations retained by the Group, if the transferred asset is measured at amortised cost; or (b) equal to the fair value of the rights and obligations retained by the Group when measured on a stand-alone basis, if the transferred asset is measured at fair value.

#### (i) Classification and subsequent measurement

In both the current and prior period, financial liabilities are classified and subsequently measured at amortised cost, except for:

- Financial liabilities at fair value through profit or loss: this classification is applied to derivatives, financial liabilities held for trading (e.g. short positions in the trading booking) and other financial liabilities designated as such at initial recognition. Gains or losses on financial liabilities designated at fair value through profit or loss are presented partially in other comprehensive income (the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability, which is determined as the amount that is not attributable to changes in market conditions that give rise to market risk) and partially profit or loss (the remaining amount of change in the fair value of the liability). This is unless such a presentation would create, or enlarge, an accounting mismatch, in which case the gains and losses attributable to changes in the credit risk of the liability are also presented in profit or loss;
- Financial liabilities arising from the transfer of financial assets which did not qualify for derecognition, or when the continuing involvement approach applies. When the transfer of financial asset did not qualify for derecognition, a financial liability is recognised for the consideration received for the transfer. In subsequent periods, the Group recognises any expense incurred on the financial liability; when continuing involvement approach applies; and
- Financial guarantee contracts and loan commitments.

#### 2.6 Financial assets and liabilities (Continued)

#### Financial liabilities (Continued)

#### (ii) Derecognition

Financial liabilities are derecognised when they are extinguished (i.e. when the obligation specified in the contract is discharged, cancelled or expires).

The exchange between the Group and its original lenders of debt instruments with substantially different terms, as well as substantial modifications of the terms of existing financial liabilities, are accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability. In addition, other qualitative factors, such as the currency that the instrument is denominated in, changes in the type of interest rate, new conversion features attached to the instrument and change in covenants are also taken into consideration. If an exchange of debt instruments or modification of terms is accounted for as an extinguishment, any costs or fees incurred are recognised as part of the gain or loss on the extinguishment. If the exchange or modification is not accounted for as an extinguishment, any costs or fees incurred adjust the carrying amount of the liability and are amortised over the remaining term of the modified liability.

就貸款承擔及財務擔保合約而言,虧損準備乃確認為撥備。然而,包含貸款及未提取承擔之合約及本集團不能從該貸款組成部份中分開識別未提取承擔組成部份之預期信貸虧損,未提取承擔之預期信貸虧損乃連同貸款之虧損準備一起確認。倘合併之預期信貸虧損超過貸款之賬面淨值,預期信貸虧損乃確認為撥備。

### 2.7 Financial guarantee contracts and loan commitments

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of a debt instrument. Such financial guarantees are given to banks, financial institutions and others on behalf of customers to secure loans, overdrafts and other banking facilities.

Financial guarantee contracts are initially measured at fair value and subsequently measured at the higher of:

- The amount of the loss allowance; and
- The fee received on initial recognition less income recognised in accordance with the principles of HKFRS 15 "Revenue from Contracts with Customers".

Loan commitments provided by the Group are measured as the amount of the loss allowance. The Group has not provided any commitment to provide loans at a below-market interest rate, or that can be settled net in cash or by delivering or issuing another financial instrument.

For loan commitments and financial guarantee contracts, the loss allowance is recognised as a provision. However, for contracts that include both a loan and an undrawn commitment and the Group cannot separately identify the expected credit losses on the undrawn commitment component from those on the loan component, the expected credit losses on the undrawn commitment are recognised together with the loss allowance for the loan. To the extent that the combined expected credit losses exceed the gross carrying amount of the loan, the expected credit losses are recognised as a provision.

#### 2.8 衍生工具及對沖活動

衍生工具最初於訂立衍生工具合約之日按公平值 確認,其後按公平值重新計量。當衍生工具的公 平值為正數時,均作為資產入賬;當公平值為負 數時,則作為負債入賬。

某些衍生工具嵌入混成合約(例如可換股債券內之 兑換期權)。倘混成合約包含之主體為金融資產, 則本集團按上述金融資產部份之闡述評估整體合 約作分類及計量用途。否則,內嵌衍生工具作為 個別衍生工具處理倘:

- 其經濟性質及風險與主合約並無密切關係;
- 具有相同條款之個別工具將符合衍生工具之 定義;及
- 混成合約並非按以公平值計量且其變動計入 損益計量。

除本集團選擇指定該混成合約為以公平值計量且 其變動計入損益外,此等內嵌衍生工具乃按公平 值分開入賬,其公平值的變動於綜合收益賬內確 認。

確認公平值收益或虧損的方法取決於該衍生工具 是否被指定及符合資格為對沖工具,如屬者則須 取決其對沖項目之性質。本集團指定若干衍生工 具為已確認資產或負債或確定之承擔公平值的對 沖工具(公平值對沖)。

本集團於訂立對沖時需記錄對沖項目與所對沖工 具的關係,並包括其風險管理目標及進行若干對 沖交易的策略。本集團亦於開始對沖後持續就其 用於對沖交易的衍生工具是否對對銷公平值變動 有顯著成效作出評估。

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.8 Derivative and hedging activities

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative.

Certain derivatives are embedded in hybrid contracts, such as the conversion option in a convertible bond. If the hybrid contract contains a host that is a financial asset, then the Group assesses the entire contract as described in the financial assets section above for classification and measurement purposes. Otherwise, the embedded derivatives are treated as separate derivatives when:

- Their economic characteristics and risks are not closely related to those of the host contract;
- A separate instrument with the same terms would meet the definition of a derivative; and
- The hybrid contract is not measured at fair value through profit or loss.

These embedded derivatives are separately accounted for at fair value, with changes in fair value recognised in the consolidated income statement unless the Group chooses to designate the hybrid contracts at fair value through profit or loss.

The method of recognising the resulting fair value gain or loss depends on whether the derivative is designated and qualifies as a hedging instrument, and if so, the nature of the item being hedged. The Group designates certain derivatives as hedges of the fair value of recognised assets or liabilities or firm commitments (fair value hedges).

The Group documents, at the inception of the hedge, the relationship between hedged items and hedging instruments, as well as its risk management objective and strategy for undertaking various hedge transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values of hedged items.

#### 2.8 衍生工具及對沖活動(續)

#### (甲) 公平值對沖

已指定並符合條件作公平值對沖的衍生工具的公平值變動,連同與對沖風險相關的對沖資產或負債的任何公平值變動,均於綜合收益賬內「淨買賣收入一以公平值對沖之金融工具之淨收益/(虧損)」項下入賬。

倘該對沖不再符合對沖會計處理的標準,則應用實際利率法釐定該被對沖項目賬面值的調整數,按到期前期間於收益賬內攤銷。對沖權益性證券賬面值之調整及包含在保留盈利直至出售該被對沖項目為止。倘該對沖關係不再符合對沖會計處理的標準或因終止確認以外的原因而被中止,例如由於對沖項目的償付、對沖項目的未攤銷賬目值調整(終止對沖項目時的賬面價值與倘從不存在對沖項目時的賬目值兩者之差額)在剩餘期間內攤銷到收益表中。倘中止確認對沖項目,其未攤銷賬面值之調整立即在收益賬確認。

### (乙) 不符合作對沖會計處理的衍生工 具

若干衍生工具並不符合作對沖會計處理。任何不符合作對沖會計處理的衍生工具的公平值變動即時於綜合收益賬內「淨買賣收入一持作買賣用途的衍生工具之淨收益/(虧損)」項下確認。就與指定金融資產或金融負債一同管理之衍生工具而言,因其公平值變動而產生之收益及虧損列入「淨買賣收入一以公平值計量且其變動計入損益的金融工具之淨收益/(虧損)」項下。

#### 2.8 Derivative and hedging activities (Continued)

#### (a) Fair value hedge

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the consolidated income statement under "Net trading income – Net gain/(loss) arising from financial instruments subject to fair value hedge", together with any changes in the fair value of the hedged asset that are attributable to the hedged risk.

If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item for which the effective interest method is used is amortised to profit or loss over the period to maturity. If the hedge relationship no longer meets the criteria for hedge accounting or is terminated for reasons other than derecognition, e.g. due to repayment of the hedged item, the unamortised carrying value adjustment (the difference between the carrying value of the hedged item at the time of termination and the value at which it would have been carried had the hedge never existed) to the hedged item is amortised to the income statement over the remaining life of the hedged item by the effective interest method. If the hedged item is derecognised, the unamortised carrying value adjustment is recognised immediately in the income statement.

# (b) Derivatives that do not qualify for hedge accounting

Certain derivative instruments do not qualify for hedge accounting. Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognised immediately in the consolidated income statement under "Net trading income – Net gain/(loss) from derivatives entered into for trading purpose". For derivatives that are managed in conjunction with designated financial assets or financial liabilities, the gains and losses arising from changes in their fair value are included under "Net trading income – Net gain/(loss) on financial instruments at fair value through profit or loss".

#### 2.10 出售及回購協議

#### 2.9 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Bank or the counterparty.

#### 2.10 Sale and repurchase agreements

The liability to counterparties in respect of securities sold subject to repurchase agreements ("repos") is included in amounts due to other banks, deposits from banks, or other accounts and accruals, as appropriate. Securities purchased under agreements to resell ("reverse repos") are recorded as loans and advances to other banks or customers, as appropriate. The difference between the sale and repurchase price is treated as interest and accrued over the life of the agreements using the effective interest method. Securities lent to counterparties are also retained in the consolidated financial statements.

Securities borrowed are not recognised in the consolidated financial statements, unless these are sold to third parties, in which case the purchases and sales are recorded with the gain or loss included in trading income. The obligation to return them is recorded at fair value as a trading liability.

#### 2.11 Repossessed assets

Loans on which collateral assets have been repossessed are not derecognised and are carried in the consolidated statement of financial position with appropriate amounts of impairment allowances made. In the case of delinquent loans on which collateral assets have been foreclosed and repossessed by the Group pursuant to legal arrangements or court orders, and with the legal title of the assets having been passed to the Group, such loans are derecognised. The foreclosed assets held for resale are included in "Advances and other accounts – Other assets".

#### 2.12 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker is the person or group of persons that allocates resources to and assesses the performance of the operating segments of an entity. The Group has determined the Chief Executive and members of the Executive Committee ("EC") as its chief operating decision maker.

All transactions between operating segments are conducted on an arm's length basis, with inter-segment revenues and costs being eliminated on consolidation. Income and expenses directly associated with each segment are included in determining operating segment performance.

Based on the requirements of HKFRS 8 "Operating Segments", the Group has the following segments: Personal Banking, Corporate Banking, Treasury and Global Markets, Overseas Banking and Others.

#### 2.13 Foreign currency translation

#### (a) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in HK dollars, which is the Group's presentation currency and the functional and presentation currency of the Bank and major part of the Group.

#### (b) Transactions and balances

Foreign currency transactions are translated into the functional currency of the relevant entity using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated income statement.

All foreign exchange gains and losses recognised in the consolidated income statement are presented net in the consolidated income statement within the corresponding item. Foreign exchange gains and losses on other comprehensive income items are presented in the consolidated statement of comprehensive income within the corresponding item.

In the case of changes in the fair value of foreign currency denominated monetary assets classified as FVOCI, a distinction is made between translation differences resulting from changes in amortised cost of the assets and other changes in the carrying amount of the assets. Translation differences related to changes in the amortised cost are recognised in the consolidated income statement, and those related to changes in the carrying amount, except for impairment, are recognised in other comprehensive income.

Translation differences on non-monetary items, such as investments in equity instruments held at fair value through profit or loss, are reported as part of the fair value gain or loss. Translation difference on certain other non-monetary items, such as equities classified as FVOCI, are included in the investment revaluation reserve in other comprehensive income.

### 2.13 Foreign currency translation (Continued)

#### (c) Group companies

The results and financial position of all the Group's entities (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (i) assets and liabilities for each statement of financial position presented are translated at the closing rate at the date of that statement of financial position;
- (ii) income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- (iii) all resulting exchange differences are recognised as a separate component of equity.

Exchange differences arising from the above processes are reported in shareholders' equity under "Exchange reserve".

On consolidation, exchange differences arising from the translation of the net investment in foreign entities are taken to shareholders' equity. When a foreign operation is sold, such exchange differences are recognised in the consolidated income statement as part of the gain or loss on sale.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate.

#### 2.14 Premises and other fixed assets

Premises comprise mainly offices and shops. Leasehold land and all other fixed assets are stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are expensed in the consolidated income statement during the financial period in which they are incurred.

Premises

Furniture, fittings, equipment Over the estimated useful lives and motor vehicles generally between 3 and 10 years or the unexpired terms of the lease, whichever is shorter

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each end of the reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (Note 2.17).

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in the consolidated income statement.

#### 2.15 投資物業

持作收取長期租金收益或獲取資本增值或兩者兼 得且並非由集團旗下公司所佔用之物業被歸類為 投資物業。

投資物業最初以成本值(包括相關交易費用)計量。

在初始確認後,投資物業按公平值列賬。公平值 乃以活躍市場之價格為基礎,於需要時就特定之 資產性質、地點或狀況之任何差異作出調整。倘 該等資料無法得到,本集團則應用替代估值法, 例如按次活躍市場最近之價格或貼現現金流量預 測進行估值。該等估值乃依照國際估值準則委員 會頒佈之指引完成。該等估值每年由外聘估值師 進行。重建並持續用作投資物業之投資物業,或 其市場活躍度下降之投資物業繼續按公平值計量。

投資物業之公平值反映(其中包括)現時租賃之租 金收入及按現行市況預期之未來租金收入。

只有當與該項目可能給本集團帶來關連之未來經 濟利益及該項目之成本可被可靠地計量時,後期 開支才會計入該資產之賬面值。所有其他維修支 出於其產生之相關財政期間記入綜合收益賬內。

公平值變動於綜合收益賬內確認。

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.15 Investment properties

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the companies in the consolidated Group, is classified as investment property.

Investment property is measured initially at its cost, including related transaction costs.

After initial recognition, investment property is carried at fair value. Fair value is based on active market prices, adjusted, if necessary, for any difference in the nature, location or condition of the specific asset. If this information is not available, the Group uses alternative valuation methods such as recent prices on less active markets or discounted cash flow projections. These valuations are performed in accordance with the guidance issued by the International Valuation Standards Committee. These valuations are reviewed annually by external valuers. Investment property that is being redeveloped for continuing use as investment property, or for which the market has become less active, continues to be measured at fair value.

The fair value of investment property reflects, among other things, rental income from current leases and assumptions about rental income from future leases in the light of current market conditions.

Subsequent expenditure is charged to the asset's carrying amount only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed in the consolidated income statement during the financial period in which they are incurred.

Changes in fair values are recognised in the consolidated income statement.

#### 2.15 投資物業(續)

倘投資物業由本集團旗下公司所佔用,則重新歸類為行產及其他固定資產,其於重新歸類日期之公平值將成為其成本值。

倘某些行產及其他固定資產因其用途改變而轉為 投資物業,根據香港會計準則第16號,該資產於 轉讓日之賬面值與公平值間任何差額,將當作行 產及其他固定資產之重估而確認於權益賬內。然 而,倘該公平值增值抵銷過往之減值虧損,該增 值則於綜合收益賬內確認。

#### 2.16 商譽及無形資產

商譽指收購之成本超逾本集團應佔被收購者於收 購日期之可認明資產及負債公平值淨值之金額。 商譽按成本減所有累積虧損列示。商譽將每年進 行減值測試。商譽的減值虧損不能回撥,出售實 體之收益及虧損包含該出售實體之商譽賬面值。

商譽須被分配至各現金產生單位以作為其減值測 試。所分配之單位為預期可受惠於產生該商譽之 業務合併之各現金產生單位或各組現金產生單位。

倘因收購而產生之無形資產可與商譽獨立確認,或倘因合約或其他法律權利而產生之無形資產,及其價值可以可靠地估計,則無形資產與商譽分開確認。無形資產包括商標及核心存款、合約以及客戶關係的無形資產。無形資產根據預計使用年期按成本減攤銷及/或累積減值虧損列示。攤銷按其介乎5至12年之預計使用年期以餘額遞減法計算。

# 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.15 Investment properties (Continued)

If an investment property becomes owner-occupied, it is reclassified as premises and other fixed assets, and its fair value at the date of reclassification becomes its cost for accounting purposes.

If an item of premises and other fixed assets becomes an investment property because its use has changed, any difference resulting between the carrying amount and the fair value of this item at the date of transfer is recognised in equity as a revaluation of premises and other fixed assets under HKAS 16. However, if a fair value gain reverses a previous impairment loss, the gain is recognised in the consolidated income statement.

#### 2.16 Goodwill and intangible assets

Goodwill represents the excess of the cost of an acquisition over the Group's share of the net fair value of the identifiable assets and liabilities of the acquiree as at the date of acquisition. Goodwill is carried at cost less any accumulated impairment losses. Goodwill is tested annually for impairment. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination on which the goodwill arose.

Intangible assets arising from an acquisition are recognised separately from goodwill when they are separable or arise from contractual or other legal rights, and their value can be measured reliably. They include trade names and intangible assets of core deposits, contracts and customer relationships. Intangible assets are stated at cost less amortisation, and/or accumulated impairment losses. Amortisation is calculated based on estimated useful life ranging from 5 to 12 years using a diminishing balance method.

即期税項支出按照本銀行之附屬公司、聯營公司及合營公司其獲得應課税收入之地區於報告期末已頒佈或實質上已頒佈之稅法作為基準計算。管理層定期就適用稅例內須作詮釋之情況評估報稅表內之申報狀況,並在適當時按預計須繳付予稅務機關之金額作為撥備基準。

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

## 2.17 Impairment of goodwill, intangible assets and nonfinancial assets

Assets that have an indefinite useful life or are not yet available for use are not subject to amortisation, but are tested annually for impairment. Assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels (cash-generating units) for which there are separately identifiable cash flows. Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

In the Bank's financial statements, impairment testing of the investment in a subsidiary or an associate is also required upon receiving dividend from that entity if the dividend exceeds the Bank's share of the total comprehensive income of that entity concerned in the period the dividend is declared or if the carrying amount of that entity in the Bank's statement of financial position exceeds the Bank's share of the carrying amount of that entity's net assets including goodwill in its consolidated statement of financial position.

#### 2.18 Current and deferred income tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in the consolidated income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In such case, the tax is recognised in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantially enacted at the end of the reporting period in the countries where the Bank and the subsidiaries, associates and joint ventures generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.18 Current and deferred income tax (Continued)

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred income tax is determined using tax rates that have been enacted or substantially enacted by the end of the reporting period and that are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. The tax effects of income tax losses available for carry forward are recognised as an asset when it is probable that future taxable profits will be available against which these losses can be utilised.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, associates and jointly controlled entities, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax related to investment properties is measured according to the tax consequence on the presumption that they are recovered entirely through sale.

Deferred income tax related to fair value re-measurement of debt securities at FVOCI, which is charged or credited directly to other comprehensive income, is also credited or charged directly to other comprehensive income and is subsequently recognised in the consolidated income statement upon the realisation of relevant investments.

#### 2.19 Employee benefits

#### (a) Pension obligations

The Group offers a mandatory provident fund scheme and a number of defined contribution plans, the assets of which are generally held in separate trustee-administered funds. These pension plans are funded by payments from employees and by the relevant Group companies.

The Group's contributions to the mandatory provident fund schemes and defined contribution retirement schemes are expensed as incurred. Other than mandatory provident fund contribution, the Group's contributions may be reduced by contributions forfeited by those employees who leave prior to vesting fully in the contributions.

#### (b) Share-based compensation

#### (i) Share option schemes

The Group has the choice to pay the intrinsic value of the share option or to issue new shares to a grantee at the date of exercise under the share-based compensation plans. The total amount to be expensed over the vesting period is determined by reference to the fair value according to settlement type.

For cash-settled share-based compensation, the total cost is the fair value of the options granted, with re-measurement at each reporting period with any change in the cost recognised in the consolidated income statement, with a corresponding credit or adjustment to the "Liabilities".

For equity-settled share-based compensation, the total cost is measured and recognised based on the fair value of the equity options at the grant date, with a corresponding credit to the "Shared-based compensation reserve" in the shareholders' funds. The total cost, which is fixed based on the fair value at the grant date, is charged to consolidated income statement in accordance with the terms of the vesting of the options over time. When the options are exercised, the holding company will issue new shares to settle its obligation, and transfer applicable amount from the "Share-based compensation reserve" to the "Share capital" account.

#### (ii) Share award schemes

For award shares under the Share Award Scheme, the amount to be expensed as share-based compensation expenses is determined by reference to the fair value of the award shares granted, taking into account all non-vesting conditions associated with the grants on grant date. The total expenses is recognised over the relevant vesting periods or on the grant date if the shares vest immediately, with a corresponding credit to the "Shared-based compensation reserve" in the shareholders' funds.

For those awarded shares which are amortised over the vesting periods, the Group reviews its estimates of the number of award shares that are expected ultimately vest based on the vesting conditions at the end of each reporting period. Any resulting adjustment to the cumulative amount recognised in prior years is charged or credited to share-based compensation expenses in the current year, with a corresponding adjustment to "Share-based compensation reserve".

Where award shares are acquired by the Share Award Scheme from the market or by electing for scrip in lieu of cash dividends, the total consideration of acquired from the market (including any directly attributable costs) or under the scrip dividend scheme is presented as "Shares held for share award scheme" and deducted from total equity.

Upon vesting, the related costs of the vested award shares purchased from the market and shares acquired from reinvesting cash dividends or received under the scrip dividend scheme (dividend shares) are credited to "Shares held for share award scheme", with a corresponding decrease in "Share-based compensation reserve" for the purchased shares, and decrease in retained earnings for the dividend shares.

## (c) Employee leave entitlements

Employee entitlements to annual leave and long service leave are recognised when they accrue to employees. An accrual is made for the estimated liability for annual leave and long service leave as a result of services rendered by employees up to the end of the reporting period.

#### (d) Bonus plans

Liabilities for bonus plans due wholly within twelve months after the end of the reporting period are recognised when the Group has a present or constructive obligation as a result of services rendered by employees and a reliable estimate of the obligation can be made.

#### 2.20 Provisions

Provisions are recognised when: the Group has a present legal or constructive obligation as a result of past events; it is more likely than not that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

- 固定付款(包括實質上固定付款),扣除任何 應收租賃優惠,

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.21 Leases

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group.

Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of real estate for which the Group is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable,
- variable lease payments that are based on an index or a rate, initially measured using the index or rate as at the commencement date, if any
- amounts expected to be payable by the Group under residual value guarantees, if any
- the exercise price of a purchase option if the Group is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

#### 2.21 租賃(續)

租賃付款使用隱含於租賃之利率貼現。倘若不能隨時釐定該利率(其為本集團內租賃之一般情況),則使用個別承租人之新增借貸利率,即承租人將會需要支付之利率以獲得借貸所需資金從而取得在同類經濟環境、同類條款,擔保及條件下與使用權資產同類價值相近之資產。

#### 就釐定新增借貸利率,本集團:

- 於可行情況,使用個別承租人近期取得之第 三方融資為起點,再就取得第三方融資後之 融資狀況變動作出調整,
- 使用由下而上方法,以無風險利率為起點, 再就本集團持有之租賃(其並無取得近期之 第三方融資)之信貸風險作出調整,及
- 就租賃作出特定調整,例如條款、國家、貨幣及擔保物。

租賃支出分配在本金及財務成本之間。財務成本 於租賃期間在收益賬中支銷以就於各個期間內之 負債的剩餘結餘製定一個持續之定期的利率。

#### 使用權資產以成本計量,並包括下列項目:

- 租賃負債之初始計量金額,
- 任何於生效日期或之前的租賃付款(扣除任何收取之租賃優惠),
- 任何初始直接開支,及
- 修復開支。

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.21 Leases (Continued)

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Group, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

To determine the incremental borrowing rate, the Group:

- where possible, uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received,
- uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held by the Group, which does not have recent third party financing, and
- makes adjustments specific to the lease, e.g. term, country, currency and security.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Right-of-use assets are measured at cost comprising the following:

- · the amount of the initial measurement of lease liability,
- any lease payments made at or before the commencement date less any lease incentives received,
- any initial direct costs, and
- restoration costs.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### 2.21 Leases (Continued)

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Payments associated with short-term leases and all leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less.

Lease income from operating leases where the Group is a lessor is recognised in income on a straight-line basis over the lease term.

#### 2.22 Fiduciary activities

The Group commonly acts as trustees and in other fiduciary capacities that result in the holding or placing of assets on behalf of individuals, trusts and other institutions. These assets are excluded from the consolidated financial statements, as they are not assets of the Group.

#### 2.23 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

Dividends on ordinary shares are recognised as a liability in the consolidated financial statements in the period in which they are approved by shareholders.

#### 2.24 Cash and cash equivalents

In the statement of cash flows, cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition, including: cash, balances with banks and other financial institutions, treasury bills, other eligible bills and certificates of deposit and investment securities which are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

#### 2.25 Contingent liabilities and contingent assets

A contingent liability is a possible obligation that arises from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Group. It can also be a present obligation arising from past events that is not recognised because it is not probable that an outflow of economic resources will be required or the amount of obligation cannot be measured reliably.

A contingent liability is not recognised but is disclosed in the notes to the consolidated financial statements. When a change in the probability of an outflow occurs so that outflow is probable, it will then be recognised as a provision.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or nonoccurrence of one or more uncertain events not wholly within the control of the Group.

A contingent asset is not recognised but is disclosed in the notes to the consolidated financial statements when an inflow of economic benefits is probable. When such inflow is virtually certain, an asset is recognised.

#### 3. FINANCIAL RISK MANAGEMENT

The Group's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial business, and operational risks are an inevitable consequence of being in business. The Group's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Group's financial performance.

The Group's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Group regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

最主要之風險類別為信貸風險、流動資金風險、 市場風險和操作風險。市場風險包括外匯風險、 利率風險及其他定價風險。

#### 3. FINANCIAL RISK MANAGEMENT (Continued)

Risk management is carried out pursuant to the overall strategy and policies approved by the Board of Directors. The Risk Management and Compliance Committee ("RMCC") under the authority delegated by the Board oversees and guides the management of different risks which are more particularly managed and dealt with by the Group Risk Division ("GRD") and different functional committees. In addition, Internal Audit is responsible for the independent review of risk management and the control environment.

To further enhance the risk governance and risk management standards, the Board has approved a Risk Strategy framework that also covers the Group's Risk Appetite framework. The Risk Strategy sets out the core values and high level risk management direction of the Group, taking into account the overall business strategy and direction, under which a robust Risk Appetite framework is established to guide the strategic planning process and strengthen the risk-return management. Fundamentally, the Risk Appetite framework sets out the types and amount of risk that the Group is willing to take in order to achieve its business plan. The Group's risk appetite metrics are composed of key indicators for measuring capital, risks, return and liquidity and this is supplemented by a set of risk tolerances made up of major risk limits of the Group. In order to ensure that business is conducted within our established risk appetite, monitoring on the compliance with the risk appetite limits and risk tolerance is undertaken on a quarterly basis. In this connection, the Group has set out its Risk Appetite Statement that covers five key dimensions of the risks and returns of the Group, namely, the target returns to shareholders, earnings volatility, solvency, liquidity and other key risk measures. The GRD is responsible for the ongoing monitoring of the compliance with the Risk Appetite Statement and the regular reporting of the status to the RMCC and the Board. Moreover, the Risk Appetite framework and major risk appetite limits are subject to review by the RMCC and the Board on an annual basis.

The most important types of risk are credit risk, liquidity risk, market risk and operational risk. Market risk includes currency risk, interest rate risk and other price risks.

#### 3.1 應用金融工具策略

本集團接受定息或浮息及不同年期之客戶存款,並以此取得之資金投資於各種類別的資產以賺取息差收入。本集團尋求透過整合短期資金及按較高利率借出較長期之款項以增加此等息差收入,同時並保持足夠之流動資金以應付可能須付之所有到期債務。

本集團亦按信貸風險及市場情況,透過向商業及 零售借款人貸款賺取息差,以及向客戶收取合理 費用及佣金。此等活動風險不單涉及資產負債表 內之貸款及墊款,亦涉及本集團提供擔保及其他 承擔,例如信用證、履約保證及其他保證。

本集團亦通過交易所及場外交易(「場外交易」)買 賣包括衍生工具之金融工具,藉著證券、債券、 貨幣及利率之短期波動賺取利潤。董事會制定交 易限額以控制不同程度之市場持倉風險。除指定 對沖安排外,有關外匯及利率之風險一般以訂立 對銷持倉(包括與客戶及市場對手之交易)或利用 衍生工具作對沖,藉此控制有關市場持倉套現之 現金淨值。

本集團亦應用利率掉期及其他利率衍生工具以減輕因利率變動令定息資產公平值下降或定息負債公平值上升之利率風險。若干金融工具被用作公平值對沖,對沖項目之細節,包括被對沖項目、金額、利率、對沖期及目的,皆於各公平值對沖項目開始時被確定和記錄,亦於開始對沖時按預期基礎評估及不時根據實際經驗及估價重新評估對沖有效性。倘公平值對沖關係不符合對沖會計的有效性測試標準,則對沖會計方法將於此公平值對沖失效日起停止。

## 3. FINANCIAL RISK MANAGEMENT (Continued)

#### 3.1 Strategy in using financial instruments

The Group accepts deposits from customers at both fixed and floating rates, and for various periods, and seeks to earn positive interest margins by investing and lending these funds in a wide range of assets. The Group seeks to increase these margins by consolidating short-term funds and lending for longer periods at higher rates, while maintaining sufficient liquidity to meet all claims that might fall due.

The Group also seeks to apply its interest margins through its lending to commercial and retail borrowers and to charge customers appropriate fees and commission, taking into consideration credit risk and market conditions. Such exposures involve not just on-balance sheet loans and advances, as the Group also enters into guarantees and other commitments such as letters of credit, performance bonds and other bonds.

The Group also trades in financial instruments where it takes positions in exchange-traded and over-the-counter ("OTC") instruments, including derivatives, to take advantage of short-term market movements in equities and bonds and in currencies and interest rates. The Board places trading limits on the level of exposures that can be taken in relation to market positions. Apart from specific hedging arrangements, foreign exchange and interest rate exposures are normally offset by entering into counterbalancing positions (including transactions with customers or market counterparties), or by the use of derivatives, thereby controlling the variability in the net cash amounts required to liquidate market positions.

The Group also uses interest rate swap and other interest rate derivatives to mitigate interest rate risk arising from changes in interest rates that will result in decrease in the fair value of fixed rate assets or increase in the fair value of fixed rate liabilities. Part of these financial instruments are designated as fair value hedges, and the terms of hedge including hedged item, amount, interest rates, hedge period and purpose are determined and documented at the inception of each fair value hedge. Hedge effectiveness is assessed at inception on a prospective basis and is reassessed, on an ongoing basis, based on actual experience and valuation. Fair value hedge relationships that do not meet the effectiveness test requirement of hedge accounting are discontinued with effect from the date of ineffectiveness of the fair value hedge.

#### 利率風險之公平值對沖

本集團採用利率掉期以對沖指標利率對發行之定息負債及持有之定息債務證券所產生之公平值變動風險。其支付浮息/收取定息之利率掉期與特定的定息負債配對,或支付定息/收取浮息之利率掉期與持有之定息債務證券配對(其條款與對沖項目之關鍵條款緊密一致)。

本集團僅對沖利率風險部分及管理但非對沖其他 風險(例如信貸風險)。本集團應用對沖會計處理 之利率風險源自發行之定息負債及持有之定息債 務證券,其公平值因指標利率變動而波動。由於 指標利率之變動重大地影響發行之負債或債務證 券之公平值變動,本集團僅就指標利率對沖利率 風險。當經濟對沖關係符合對沖會計處理之準則 時則應用對沖會計處理。

本集團應用公平值對沖會計處理前,按對沖項目 之質化特性及量化分析支持對沖風險之評估釐定 對沖項目與對沖工具間是否存在經濟關係。本集 團在評估經濟關係是否存在時會考慮對沖項目及 對沖工具之關鍵條款是否緊密一致。本集團評估 對沖項目及對沖工具之公平值是否就同類型風險 有同樣反應。

#### Fair value hedges of interest rate risk

The Group uses interest rate swaps to hedge its exposure to changes in the fair values of fixed-rate issued liabilities and fixed-rate debt securities held in respect of a benchmark interest rate. Pay-floating/receive-fixed interest rate swaps are matched to specific issuances of fixed-rate liabilities or pay-fixed/receive-floating interest rate swaps are matched to fixed-rate debt securities held with terms that closely align with the critical terms of the hedged item.

Only the interest rate risk element is hedged and therefore other risks, such as credit risk, are managed but not hedged by the Group. Interest rate risk to which the Group applies hedge accounting arises from fixed-rate issued liabilities and fixed-rate debt securities held, whose fair value fluctuates when benchmark interest rates change. The Group hedges interest rate risk only to the extent of benchmark interest rates because the changes in fair value of an issued liability or debt security are significantly influenced by changes in the benchmark interest rate. Hedge accounting is applied where economic hedge relationships meet the hedge accounting criteria.

Before fair value hedge accounting is applied by the Group, the Group determines whether an economic relationship between the hedged item and the hedging instrument exists based on an evaluation of the qualitative characteristics of these items and the hedged risk that is supported by quantitative analysis. The Group considers whether the critical terms of the hedged item and hedging instrument closely align when assessing the presence of an economic relationship. The Group evaluates whether the fair value of the hedged item and the hedging instrument respond similarly to similar risks.

本集團透過促使定息債務證券或發行之負債之票 面價及指定為對沖工具之利率掉期之名義金額一 致而設定對沖比率。可能之對沖失效原因如下:

- (i) 市場流動性及債務證券買賣價差之變動;
- (ii) 就下一定息日前之指標利率及利率掉期之指標利率的固定息差之公平值變動;
- (iii) 不同公平值水平之利率敏感度變動;
- (iv) 交易對手及本集團本身之信貸風險對利率掉 期公平值之影響,並未反映在受利率變動影 響之對沖項目公平值:及
- (v) 持有之債務證券或發行之存款證與利率掉期 之年期差異。

#### Fair value hedges of interest rate risk (Continued)

The Group establishes a hedge ratio by aligning the par amount of the fixed-rate debt security or issued liabilities and the notional amount of the interest rate swap designated as a hedging instrument. Possible sources of ineffectiveness are as follows:

- changes in market liquidity and bid-ask spread of the debt securities;
- (ii) the fair value changes related to the benchmark rate before next fixing date and on the fixed spread over the benchmark rate of the interest rate swap;
- (iii) changes in interest rate sensitivity at different fair value level;
- (iv) the effect of the counterparty and the Group's own credit risk on the fair value of the interest rate swap, which is not reflected in the fair value of the hedged item attributable to the change in interest rate; and
- differences in maturities of the interest rate swap and the debt securities held or the certificates of deposit issued.

#### 3. FINANCIAL RISK MANAGEMENT (Continued)

#### 3.2 Credit risk

The Group's main credit risk is that borrowers or counterparties may default on their payment obligations due to the Group. These obligations arise from the Group's lending and investment activities, and trading of financial instruments (including derivatives).

The Group has a Group Credit Committee ("GCC") for approving major credit exposures. The Credit Management Committee ("CMC") and the Treasury & Investment Risk Committee ("TIRC") are the committees responsible for credit policy formulation and portfolio monitoring of the loan and treasury businesses respectively. These committees have been chaired by the Chief Executive or Group Chief Risk Officer with certain Executive Directors and senior business and credit officers as members. Credit risk measurement, underwriting, approval and monitoring requirements are detailed in credit policies.

The Group manages all types of credit risk on a prudent basis. Credits are extended within the parameters set out in the credit policies and are approved by different levels of management based upon established guidelines and delegated authorities. Credit exposures, limits and asset quality are regularly monitored and controlled by management, credit committees and GRD. The Group's internal auditors also conduct regular reviews and audits to ensure compliance with credit policies and procedures, and regulatory guidelines.

The Group has established policies and processes for the approval and review of new products and activities, and credit policies with details of the loan grading, or credit scoring, processes and impairment policies.

#### 3. 財務風險管理(續)

#### 3.2 信貸風險(續)

#### 3.2.1 信貸風險計量

#### 信貸風險評級

本集團採用內部信貸風險評級以反映借款人之信貸質素。本集團採用切合不同交易對手類別之內部信貸風險評級記分機制。信貸風險評級記分機制顧及申請時收集之借款人及特定貸款資料(例如可支配收入;及零售風險承擔之抵押品級別;和企業風險承擔之財務指標及質化指標)。就零售風險承擔而言,再輔以有關個別借款人之內部數據(例如違約狀況)及外部數據(例如信貸局之評級資料)。此外,記分機制可促使信貸風險人員以專業判斷釐定各項風險承擔之最終內部信貸評級,包括考慮其他不能計入記分機制內作參數之因素。

下列為有關本集團持有各組合類別之額外考慮:

#### 零售

初始確認後,就零售業務之個人無抵押借貸而 言,以行為評分按定期基準監察可能出現之違 約。此評分與違約或然率(「違約或然率」)配對。

#### 企業

就企業業務而言,信貸評級按借款人層面釐定。 客戶經理會按持續基礎收納任何已更新或新資料/信貸評估予信貸評級記分機制內。此外,客 戶經理並會每年從各渠道(例如借款人之財務報 表)更新有關借款人之信譽度資料。此將會決定最 新之內部信貸評級。

採用內部觀察之違約率輔以外部違約數據,及應 用統計法,違約或然率主要等級用以標定各信貸 評級之違約或然率。

## 3. FINANCIAL RISK MANAGEMENT (Continued)

#### 3.2 Credit risk (Continued)

#### 3.2.1 Credit risk measurement

#### Credit risk grading

The Group uses internal credit risk grading that reflects the credit quality of the borrowers. The Group uses internal credit grading scorecards tailored to the various categories of counterparty. The credit grading scorecards take into consideration borrower and loan specific information collected at the time of application (such as disposable income, and level of collateral for retail exposures; and financial indicators and qualitative indicators for corporate exposures). For retail exposures, this is supplemented with internal data such as delinquency status and external data such as credit bureau scoring information on individual borrowers. In addition, the scorecards enable expert judgement from the credit risk officer to determine the final internal credit grade for each exposure. This allows for considerations which may not be captured as part of the other inputs into the scorecards.

The following are additional considerations for each type of portfolio held by the Group:

#### Retail

After the date of initial recognition, for personal unsecured lending of retail business, the likelihood of default is monitored on a periodic basis by behavioural score. This score is mapped to a Probability of Default ("PD").

#### Corporate

For corporate business, the credit grade is determined at the borrower level. A relationship manager will incorporate any updated or new information/credit assessments into the credit grading scorecard on an ongoing basis. In addition, the relationship manager will also update information about the creditworthiness of the borrower every year from sources such as borrower's financial statements. This will determine the updated internal credit grading.

Using the internal observed default rate supplemented with external default data, and by applying statistical methods, PD master scales are calibrated to arrive at the PD for each credit grade.

香港財務報告準則第9號略述自初始確認後因信貸質素變動而引致減值之「3階段」模型,其概述如下:

- 於初始確認時為非信貸減值的金融工具分類為「階段1」及其信貸風險由本集團持續監察。
- 倘金融工具被識別為信貸風險自初始確認後 大幅增加(「信貸風險大幅增加」),即會轉移 至「階段2」,但仍未被視作信貸減值。
- 倘金融工具已被界定為信貸減值,則金融工 具即被轉移至「階段3」。
- 階段1金融工具之預期信貸虧損按相當於在 未來12個月內可能發生之違約事件引致之 全期預期信貸虧損部份的金額計量。階段2 或階段3之工具則根據全期基準計量其預期 信貸虧損。
- 根據香港財務報告準則第9號計量預期信貸 虧損的一個普遍概念就是必須考慮前瞻性資料。
- 購入或源生之信貸減值金融資產為該等於初始確認時已是信貸減值之金融資產。其預期信貸虧損一直按全期基準計量(階段3)。

#### 3.2.2 Expected credit loss measurement

HKFRS 9 outlines a "three-stage" model for impairment based on changes in credit quality since initial recognition as summarised below:

- A financial instrument that is not credit-impaired on initial recognition is classified in "Stage 1" and has its credit risk continuously monitored by the Group.
- If a significant increase in credit risk ("SICR") since initial recognition is identified, the financial instrument is moved to "Stage 2" but is not yet deemed to be credit-impaired.
- If the financial instrument is credit-impaired, the financial instrument is then moved to "Stage 3".
- Financial instruments in Stage 1 have their ECL measured at an amount equal to the portion of lifetime expected credit losses that result from default events possible within the next 12 months.
   Instruments in Stages 2 or 3 have their ECL measured based on expected credit losses on a lifetime basis.
- A pervasive concept in measuring ECL in accordance with HKFRS 9 is that it should consider forward looking information.
- Purchased or originated credit-impaired financial assets are those financial assets that are credit impaired on initial recognition.
   Their ECL is always measured on a lifetime basis.

#### 自初始確認起之信貸質素變動 Change in credit quality since initial recognition

本集團就準則規定採納之主要判斷和假設論述如 下:

#### 3.2.2.1 信貸風險大幅增加

當符合以下一項或多項準則時本集團認為金融工 具已陷於信貸風險大幅增加:

- 就債券組合而言,當外部信貸評級出現重大 不利轉變,由投資級別轉移至非投資級別, 或購買時原本為非投資級別之債券下降一級
- 就企業組合而言,當內部信貸評級出現轉變,根據其初始信貸評級,於一級至五級之間
- 當逾期日數(「逾期日數」)超過30天
- 就企業組合而言,當借款人已呈報為「預早 警示」
- 當借款人已按香港金融管理局(「香港金管局」)之貸款分類呈報為特別關注。分類該貸款之決定乃按借款人之償還能力及個別交易對手之違約可能性。

The key judgements and assumptions adopted by the Group in addressing the requirements of the standard are discussed below:

#### 3.2.2.1 Significant increase in credit risk

The Group considers a financial instrument to have experienced a SICR when one or more of the following criteria have been met:

- when there is significant adverse external credit rating transition for the bond portfolio, migrating from investment grade to noninvestment grade, or one notch downgrade for bond with original non-investment grade at purchase
- when there is internal credit rating transition, ranging from one notch to five notches depending on its initial credit rating, for corporate portfolio
- when the day past due ("DPD") exceeds 30 days
- when the borrower is reported as "Early Warning" for corporate portfolio
- when the borrower is reported as Special Mention according to the loan classification of the Hong Kong Monetary Authority ("HKMA"). The decision to classify the loans is based on the borrower's repayment ability and likelihood of individual counterparties defaulting.

本集團於截至2022年及2021年12月31日止年度並 無就任何金融工具使用低信貸風險豁免安排。

#### 3.2.2.2 違約及信貸減值資產之定義

- 借款人或發行人陷於重大財務困境;
- 違反合約(例如違約或逾期事件);
- 本集團重組貸款或墊款,其條款本集團在其 他情況下不會考慮;
- 借款人已破產;
- 其已按香港金管局之貸款分類呈報為次級、 呆滯或虧損。分類該貸款之決定乃按借款人 之償還能力及個別交易對手之違約可能性;

The assessment of SICR is performed on a monthly basis at a portfolio level for all retail financial instruments held by the Group. In relation to corporate financial instruments, where an Early Warning list is used to monitor credit risk, this assessment is performed at the counterparty level and on a monthly basis. The criteria used to identify SICR are revised as when appropriate by the respective credit departments of the portfolios.

The Group has not used the low credit risk exemption for any financial instruments in the year ended 31 December 2022 and 2021.

#### 3.2.2.2 Definition of default and credit-impaired assets

The Group defines a financial instrument as in default, which is aligned with the definition of credit impaired (referred to as "Stage 3 financial assets"), when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or past due event;
- the restructuring of a loan or advance by the Group on terms that the Group would not consider otherwise;
- the borrower is bankrupt;
- it is reported as substandard, doubtful or loss according to the loan classification of the HKMA. The decision to classify the loans is based on the borrower's repayment ability and likelihood of individual counterparties defaulting; and
- the disappearance of an active market for a security because of financial difficulties.

因借款人狀況惡化而重訂條款之貸款一般視為信貸減值,除非有證據證明不能收取合約現金流之風險已重大地減低及並無其他減值指標。此外,逾期90日或超過90日之零售貸款乃視為信貸減值。

## 3.2.2.3 計量預期信貸虧損 - 參數、假設及估算方法 之説明

預期信貸虧損乃根據信貸風險大幅增加是否發生或是否認為資產會減值而按12個月期間(「12個月期間」)或全期基準計量。預期信貸虧損乃違約或然率、違約風險承擔(「違約風險承擔」)及違約損失率(「違約損失率」)之經貼現後之結果,其定義如下:

- 違約或然率代表借款人在其財務責任上於下一個12個月期間(「12個月期間違約或然率」)或於責任之全期剩餘期間(「全期違約或然率」)違約之可能性(按照上述「違約及信貸減值資產之定義」)。
- 違約風險承擔乃根據本集團預計違約時於下 一個12個月期間(「12個月期間違約風險承 擔」)或於全期剩餘期間(「全期違約風險承 擔」)欠付之金額。例如,就循環承擔而言, 本集團包括即期已提取金額加上任何預期當 違約發生時,按現時合約額度,亦會被提取 之額外金額。
- 違約損失率代表本集團預計在違約風險承擔 之損失程度。違約損失率按交易對手類別、 索賠類別和排序及抵押品或其他信貸支援之 有效性而異。違約損失率按違約時付予每個 風險承擔單位之損失百分比標示。違約損失 率按12個月期間或全期基準計算,12個月 期間違約損失率乃倘若違約時,於下一個 12個月期間發生之預計產生之損失百分比 及全期違約損失率乃倘若違約時,於貸款之 預計全期剩餘期間發生時之預計產生損失百分比。

#### 3. FINANCIAL RISK MANAGEMENT (Continued)

- 3.2 Credit risk (Continued)
- 3.2.2 Expected credit loss measurement (Continued)

#### 3.2.2.2 Definition of default and credit-impaired assets (Continued)

A loan that has been renegotiated due to deterioration in the borrower's condition is usually considered to be credit-impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment. In addition, a retail loan that is overdue for 90 days or more is considered credit-impaired.

## 3.2.2.3 Measuring ECL – Explanation of inputs, assumptions and estimation techniques

The ECL is measured on either a 12-month ("12M") or Lifetime basis depending on whether a SICR has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the PD, exposures at default ("EAD"), and loss given default ("LGD"), defined as follows:

- The PD represents the likelihood of a borrower defaulting on its financial obligation (as per "Definition of default and creditimpaired" above), either over the next 12 months ("12M PD"), or over the remaining lifetime ("Lifetime PD") of the obligation.
- EAD is based on the amounts the Group expects to be owed at the time of default, over the next 12 months ("12M EAD") or over the remaining lifetime ("Lifetime EAD"). For example, for a revolving commitment, the Group includes the current drawn balance plus any further amount that is expected to be drawn up to the current contractual limit by the time of default, should it occur.
- LGD represents the Group's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, type and seniority of claim and availability of collateral or other credit support. LGD is expressed as a percentage loss per unit of exposure at the time of default. LGD is calculated on a 12-month or lifetime basis, where 12-month LGD is the percentage of loss expected to be made if the default occurs in the next 12 months and Lifetime LGD is the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan.

預期信貸虧損乃就各個未來月份及各個別風險承 擔延伸估算違約或然率、違約損失率及違約風險 承擔而釐定。此三個組成部分相乘後配以殘活可 能性作出調整(即該風險承擔於早前月分並未提早 還款或違約)。其有效計算未來各月份之預期信貸 虧損,然後再貼現至呈報日及匯總。用於計算預 期信貸虧損之貼現率乃原有之實際利率或其約數。

全期違約或然率乃應用到期日分佈至即期12個月期間而得。到期日分佈檢視組合自初始確認起至貸款期內如何形成違約。到期日分佈根據過往可見數據及假定組合及信貨級別段內之所有資產皆相同。其受到過往分析所支持。

**12**個月期間及全期之違約風險承擔乃按預計支付分佈釐定,其按產品類別而異。

- 就攤餘產品及分段式還款貸款而言,其按借款人於12個月期間及全期基準欠付之合約還款。並會就借款人之預計超額還款作出調整。提早還款/再融資之假定亦納入計算中。
- 就非循環產品而言,違約風險承擔乃使用即期已提取餘額及加上「信貸換算系數」計算, 其納入違約時剩餘額度之預計提取。
- 就循環產品而言,違約風險承擔乃採用資產 負債表內風險承擔及按使用率估計於違約時 之已使用金額間之最大金額估算。

- 3. FINANCIAL RISK MANAGEMENT (Continued)
- 3.2 Credit risk (Continued)
- 3.2.2 Expected credit loss measurement (Continued)
- 3.2.2.3 Measuring ECL Explanation of inputs, assumptions and estimation techniques (Continued)

The ECL is determined by projecting the PD, LGD and EAD for each future month and for each individual exposure. These three components are multiplied together and adjusted for the likelihood of survival (i.e. the exposure has not prepaid or defaulted in an earlier month). This effectively calculates an ECL for each future month, which is then discounted back to the reporting date and summed. The discount rate used in the ECL calculation is the original effective interest rate or an approximation thereof.

The Lifetime PD is developed by applying a maturity profile to the current 12M PD. The maturity profile looks at how defaults develop on a portfolio from the point of initial recognition throughout the lifetime of the loans. The maturity profile is based on historical observed data and is assumed to be the same across all assets within a portfolio and credit grade band. This is supported by historical analysis.

The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by product type.

- For amortising products and bullet repayment loans, this is based on the contractual repayments owed by the borrower over a 12-month or lifetime basis. This will also be adjusted for any expected overpayments made by a borrower. Early repayment/refinance assumptions are also incorporated into the calculation.
- For non-revolving products, the exposure at default is predicted by taking current drawn balance and adding a "credit conversion factor" which allows for the expected drawdown of the remaining limit by the time of default.
- For revolving products, the EAD is estimated by taking the maximum between the on-balance sheet exposure and the estimated utilised amount at default based on utilisation rate.

釐定12個月期間及全期之違約或然率、違約風險 承擔及違約損失率時亦包括前瞻性經濟資料。參 照附註3.2.2.4就前瞻性經濟資料及其包含在計算 之解説。

計算預期信貸虧損之相關假定需作定期監控及審 視(例如評估違約或然率之到期日分佈及抵押品價 值之變動)。

#### 3.2.2.4 納入預期信貸虧損模型之前瞻性資料

信貸風險大幅增加之評估及預期信貸虧損之計算 皆納入前瞻性資料。本集團已進行過往分析及認 明影響信貸風險之主要經濟變數及對各組合之預 期信貸虧損的影響。

## 3.2.2.3 Measuring ECL – Explanation of inputs, assumptions and estimation techniques (Continued)

The 12-month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. These include collateral type and projected collateral values, historical discounts to market/book values due to forced sales, time to repossession and recovery costs observed.

Forward-looking economic information is also included in determining the 12-month and lifetime PD, EAD and LGD. Refer to Note 3.2.2.4 for an explanation of forward-looking information and its inclusion in ECL calculations.

The assumptions underlying the ECL calculation, such as how the maturity profile of the PDs and how collateral values change etc., are regularly monitored and reviewed.

#### 3.2.2.4 Forward-looking information incorporated in the ECL models

The assessment of SICR and the calculation of ECL both incorporate forward-looking information. The Group has performed historical analysis and identified the key economic variables impacting credit risk and expected credit losses for each portfolio.

These economic variables and their associated impact on the PD, EAD and LGD vary by financial instrument. Expert judgement has also been applied in this process. Forecasts of these economic variables (the "base economic scenario") are provided by some economic research institutions and the in-house economic research team on a regular basis and provide the best estimate view of the economy over the next five years. For the economic variables out of the forecasting periods (i.e. after the next five years), the point-in-time default risk level at the last forecasting period is referenced to estimate the lifetime default risk level of each instrument. The impact of these economic variables on the PD, EAD and LGD has been determined by performing statistical regression analysis to understand the impact changes in these variables have had historically on default rates and loss rates.

信貸風險大幅增加之評估乃考慮信貸質素之變動、專業信貸判斷及防守性指標而進行。其釐定整體金融工具是否為階段1、階段2或階段3及是否記錄為12個月期間或全期之預期信貸虧損。緊隨該評估,本集團計量預期信貸虧損或然加權的12個月期間預期信貸虧損(階段1),或是或然加權的全期預期信貸虧損(階段2及階段3)。該等或然加權的預期信貸虧損乃透過有關預期信貸虧損模型運作各情境及乘以合適之情境加權值而釐定。

#### 預期信貸虧損模型的優化

於2022年,2019新冠肺炎疫情所帶來的經營環境 急促轉壞及史無前例的全球性經濟不穩定,由於 疫情為相當特殊的事件,超出預期信貸虧損模型 依據過往觀察之模式設定,因此預期信貸虧損模 型的準確性受到影響。加上市場對中國國內房地 產市場的憂慮及市場利率急速上升,以及在應對 宏觀經濟和市場環境的突變時,預期信貸虧損模型 型的推算可能過於敏感,從而預期信貸虧損模型 如的準確性面臨挑戰。為恰當地反映於此等宏觀經 濟情況下的信貸組合資產質素,本集團繼續於預 期信貸虧損模型結果之基礎上進行各種組合審視 並進行統計分析,以評估模型結果的合理性,並 且在必要時改進。

基於以上背景,本集團已採用由具信譽的宏觀經濟分析機構提供的宏觀經濟預測細化預期信貸虧損模型使用的宏觀經濟因素,這將帶來未被當前經濟環境及上述內部評估和分析驗證的模型要求變化。這些宏觀經濟因素變動產生的預期信貸虧損影響已相應緩和2022年12月末的狀況。

#### 3. FINANCIAL RISK MANAGEMENT (Continued)

- 3.2 Credit risk (Continued)
- 3.2.2 Expected credit loss measurement (Continued)
- 3.2.2.4 Forward-looking information incorporated in the ECL models (Continued)

The assessment of SICR is performed by considering either the change in credit quality, expert credit judgement and backstop indicator. This determines whether the whole financial instrument is in Stage 1, Stage 2, or Stage 3 and hence whether 12-month or lifetime ECL should be recorded. Following this assessment, the Group measures ECL as either a probability weighted 12-month ECL (Stage 1), or a probability weighted lifetime ECL (Stages 2 and 3). These probability-weighted ECLs are determined by running each scenario through the relevant ECL model and multiplying it by the appropriate scenario weighting.

#### ECL model refinements

In 2022, the COVID-19 pandemic had led to rapid deterioration in business conditions and unprecedented economic uncertainty, which had affected the performance of ECL models since it is a rather exceptional event that was beyond historical observations of the model setting. Coupled with market's concern on the PRC property developer sector as well as the rapid rise in interest rates, there were challenges to model performances as the ECL estimates could be overly sensitive in response to such interplay of abrupt changes in macroeconomic factors and market environment. To properly reflect asset quality of the credit portfolios under such conditions, the Group continued to conduct various portfolio reviews and performed statistical analysis to assess reasonableness of ECL model outputs and come up with refinements, if considered necessary.

Against such background, refinements were made on a few macroeconomic factor inputs used in ECL models as forecasts of those factors given by reputable macroeconomic forecast agencies would lead to movements in ECL requirements that was not substantiated by the prevailing economic environment as well as results of internal assessments and analysis mentioned above. The relevant ECL impact arising from the movements of those macroeconomic factors had been moderated accordingly for end-December 2022 position.

#### 管理層之判斷及叠加調整

於2021年年末,考慮到市場對部分中國房地產發展商信貸惡化的關注,此事件之例外性超出了一般投資組合現象與預期信貸虧損模型依據歷史觀察的設定,為此本集團對預期信貸虧損模型的計算增加了相當金額的撥備,以應對中國房地產發展商的未能預計的信貸虧損。有關對中國房地產發展商的信貸風險敞口已於2022年期間被下調信貸評級,與此同時管理層已叠加實現於當年年間預期信貸虧損撥備的一部份。

除上述以外,本集團於2021年12月末於預期信貸虧損模型為汽車融資組合實施管理層叠加,以計及對部分貸款人倘依賴政府推出的「預先批核還息不還本」計劃已經結束。當政府延長該計劃至2023年7月末,該管理層叠加維持至2022年12月末之財務狀況,並於2022年12月末之財務狀況佔汽車融資組合的總餘額0.18%。

於2022年底前,中國大陸已放寬動態清零方針,香港政府亦開始放寬社交距離措施,包括邊境限制,經濟活動有望回暖。但是,利率上升的速度及幅度為經濟復甦增加了不確定性。此外,中國房地產發展商的信貸狀況仍有待觀察。儘管如此,本集團繼續採用適當的評估和風險管理程序以用作計量預期信貸虧損,包括檢討信貸組合、不同的宏觀經濟預測情境、預期信貸虧損模型計量結果的合理性,及預期信貸虧損撥備的合理性。

Management judgments and overlay

By the end of 2021, considering the concern on credit deterioration of the PRC property developer sector, a rather exceptional event that was beyond historical observations of the model setting rather than a general portfolio phenomenon, the Group imposed considerable amount of management overlay on the outputs of ECL models in order to cater for the unexpected credit losses arising from certain PRC property developers. Relevant exposures to these concerned PRC property developers had been downgraded during 2022 and therefore the management overlay imposed had been materialised into part of the ECL provision requirements for the year.

Apart from the above, the Group imposed management overlay on the ECL model output for the vehicle finance portfolio for end-Dec 2021 position, taking into account the potential impact on certain borrowers that relied on the Government's Pre-approved Principal Payment Holiday Scheme if the Scheme came to an end. As the Government extended the Scheme to end-Jul 2023, such overlay was maintained for end-Dec 2022 position. This overlay merely accounted for 0.18% of total outstanding for the vehicle finance portfolio at end-Dec 2022 position.

By the end of 2022, Mainland China has moderated its zero-COVID policy and the HKSAR Government started to ease the social distancing measures, including border restrictions. Economic activities are expected to pick up. However, rising interest rates, depending on the pace and the magnitude, added uncertainties to the economic recovery. Besides, development of the PRC property developer is to be further observed. Against this background, the Group continued to adopt appropriate assessment and risk management procedures in the measurement of ECL, including review of credit portfolios, different macroeconomic forecast scenarios, reasonableness of the outputs of ECL models, and adequacy of ECL allowances.

Economic variable assumptions

The Group relies on a broad range of forward-looking economic indicators as model inputs, such as the forecasts of macroeconomic factors ("MEFs") such as property price indices, GDP growth rates, unemployment rates, and interest rates. The selection of MEFs had gone through stringent statistical data tests commonly adopted by the industry as well as expert judgements to ensure that MEFs used in the ECL models are relevant to and reflective of the risk profile of the Group's credit portfolios while satisfying required quantitative standards.

The scenarios "base", "good" and "bad" were determined based on the underlying assumptions described in the below table. In particular, the "base" scenario makes reference to a set of macroeconomic forecasts obtained from different economic research institutions and the Group's economist. "Good" and "bad" scenarios were developed by referencing the MEFs in the "base" scenario, with appropriate adjustment to the upside and the downside potential variations taking into account the uncertainties in the forward-looking economic environments. The magnitude of adjustment were quantified based on historical movements of the MEFs observed through a long span of observed data covering peaks and troughs of past economic cycles.

### Scenario Underlying assumptions of the scenario

Bad

Base Forward-looking macroeconomic factors are a key component of the macroeconomic outlook. The base scenario is based on a set of macroeconomic forecasts which formulate a "base case" view of the most probable future direction of relevant economic variables.

Good This scenario is determined by making reference to the "base" scenario and reflects positive uncertainties by incorporating upside variations to the "base" scenario macroeconomic forecasts.

This scenario is determined by making reference to the "base" scenario and reflects negative uncertainties by incorporating downside variations to the "base" scenario macroeconomic forecasts.

Economic variable assumptions (Continued)

Members of the CMC as well as department heads of risk units put forth their most holistic view on the likelihood of occurrence, enabling the Group to generate forecasts of economic factors and the forward-looking PD and LGD. To have further professional review and reasonableness checking, the Group's economist provided his overall view on whether the collective forecasted outcome is generally in line with his expectation. As a stringent measure, the summarized outcomes will be submitted to the CMC for final approval. These forward-looking PD and LGD are then used as input parameters in the expected credit loss model.

已顧及未以其他方式納入上述情境之其他前瞻性考慮因素(例如任何監管,立法或政治變動之影響)但未視為有重大影響,故並無就該等因素對預期信貸虧損作出調整及按季度基準審視及監控其合適度。

### 敏感度分析

影響預期信貸虧損準備的最主要假設如下:

- (i) 失業率,鑑於其對有抵押及無抵押借款人履 行合約還款能力的影響;
- (ii) 生產總值增長率,鑑於其對公司業績及抵押 品估值的重大影響;及
- (iii) 物業價格指數,鑑於其對按揭貸款抵押品估值的重大影響。

Other forward-looking considerations not otherwise incorporated within the above scenarios, such as the impact of any regulatory, legislative or political changes, have also been considered, but are not deemed to have a material impact and therefore no adjustment has been made to the ECL for such factors. This is reviewed and monitored for appropriateness on a quarterly basis.

### Sensitivity analysis

The most significant assumptions affecting the ECL allowance are as follows:

- Unemployment rates, given its impact on secured and unsecured borrowers' ability to meet their contractual repayments;
- (ii) GDP growth rates, given the significant impact on companies' performance and collateral valuations; and
- (iii) Property price indexes, given the significant impact it has on mortgage collateral valuations.

本集團已就個別借款人或交易對手集團、行業或 國家設定框架管理及控制過度集中之風險。根據 借款人或交易對手集團、行業或國家之既定風險 額度,監察其風險狀況和向信貸委員會定期匯報。

借款人或交易對手集團之最高風險額度是以資本額釐定,而行業之額度則與整體信貸組合規模相對應並受監管限額的約束。國家之額度乃參考國際評級機構對主權國之信貸評級而設定。所有設定的額度旨在達至更為平衡的組合。

就可無條件取消而不須預先通知之借貸承擔,當 借款人的信貸素質轉差,本集團將會評估撤銷信 貸額的需要性。據此,此等承擔並不對本集團構 成重大信貸風險。

所有信貸決定,無論有否收取抵押品,皆取決於客戶或交易對手的信貸資料、現金流量情況及其 還款能力。

#### 3. FINANCIAL RISK MANAGEMENT (Continued)

#### 3.2 Credit risk (Continued)

#### 3.2.3 Risk limit control and mitigation policies

The Group has an established framework to manage and control concentration risk with respect to individual borrower or counterparty group, industry or country. Exposure limits by borrower or counterparty group, industry or country are in place and their exposures are monitored and reported to credit committees regularly.

The large exposure limits to borrower or counterparty groups are capital based while the limits for industry are relative to the size of the overall credit portfolio and bounded by regulatory limit. Country limits are also set up with reference to the sovereign credit rating from international credit rating agencies. All these limits aim to achieve a more balanced portfolio.

To mitigate credit risk and where appropriate, the Group will obtain collateral to support the credit facility granted. To control credit risk exposure to counterparty arising from derivative positions, the Group limits its derivative dealings with approved financial institutions, and uses established market practices on credit support and collateral settlement to reduce credit risk exposure to derivative counterparties. Overall credit risk limit for individual financial institution counterparty, including valuation limit for derivatives, is approved by the GCC with reference to the financial strength and credit rating of individual counterparty. The acceptable types of collateral and their characteristics are established within the credit policies, as are the respective margins of finance. Enforceable legal documentation establishes the Group's direct, irrevocable and unconditional recourse to any collateral, security or other credit enhancements provided.

In relation to lending commitments that are unconditionally cancellable without prior notice, the Group would assess the necessity to withdraw the credit line in cases where the credit quality of a borrower deteriorates. Accordingly, these commitments do not expose the Group to significant credit risk.

Irrespective of whether collateral is taken, all credit decisions are based upon the customer's or counterparty's credit profile, cashflow position and ability to repay.

All counterparty credit risk for derivatives trading are managed as part of the credit risk control and monitoring process in respect of the counterparty including credit controls such as setting individual limit for valuation risk, daily settlement limits and performing periodic credit assessment. Moreover, the Group requires derivative contract counterparties to enter into International Swaps and Derivatives Association Agreement or analogous master agreement in order to follow the standardised market practice of close-out netting arrangement in the event of default or early termination and in accordance with the regulatory requirements.

Collateral arrangements with most counterparties are also in place to limit our unsecured derivative exposures to these counterparties.

## 3.2.4 Write-off policy

The Group writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include (i) ceasing enforcement activity and (ii) where the Group's recovery method is foreclosing on collateral and the value of the collateral is such that there is no reasonable expectation of recovering in full.

The Group may write-off financial assets that are still subject to enforcement activity. During the year ended 31 December 2022, the outstanding amounts of financial assets written off before completion of enforcement activity of the underlying collaterals was HK\$9 million (2021: HK\$13 million). ## 3.3 Market risk

Market risk is the risk of losses in assets, liabilities and off-balance sheet positions arising from adverse movements in market rates and prices.

Market risk exposure for different types of transactions is managed within various risk limits and guidelines approved by the Board, the RMCC and the TIRC under the authority delegated from the Board. Risk limits are set at the portfolio level as well as by products and by different types of risks. The risk limits comprise a combination of notional, stop-loss, sensitivity and value-at-risk ("VaR") controls. All trading positions are subject to daily mark-to-market valuation. The Risk Management and Control Department ("RMCD") within the GRD, as an independent risk management and control unit, identifies, measures, monitors and controls the risk exposures against approved limits and initiates specific actions to ensure positions are managed within an acceptable level. Any exceptions have to be reviewed and sanctioned by the appropriate level of management of TIRC, RMCC or the Board as stipulated in the relevant policies and procedures.

The Group applies different risk management policies and procedures in respect of the market risk arising from its trading and banking books.

# 3.3.1 Market risk arising from the trading book

## (甲) 市場風險計量方法(續)

#### (i) 市場風險數值

本集團應用市場風險數值法,其乃一種以統計為基準就持作買賣用途組合因市場不利變化預計潛在損失。其表明本集團於某個置信水平可能損失之最大數額,就一日持倉期之基準作推算,本集團之置信水平為99%。因此存在明確的統計概率,實際損失可能比市場風險數值之估計數為大。因此採納該方法並不能避免當市場狀況發生重大變化時超逾此等額度之損失。

市場風險數值模型假設某個持倉期 (就本集團而言為一天)直至結束持 倉。市場風險數值亦依據持倉之現時 市值、市場風險因素過往在一個曆年 週期之相互關係及波幅,使用一種歷 史模擬方法計算。

本集團藉著回顧測試買賣賬之市場風 險數值結果,持續確認市場風險數值 模型之有效性。所有回顧測試的偏差 予以調查及向高層管理人員匯報。

因市場風險數值為本集團之市場風險管理範疇內一重要環節,董事會及其授權之委員會就所有買賣持倉設定不同市場風險數值額度及分配至各業務部門,並至少每年審閱。風險管理及監控部每天審視包括市場風險數值之實際風險與額度對比進行監控。本集團就年內全部交易活動之市場風險數值日均值為3,388,000港元(2021年:1,379,000港元)。

#### (i) Value at risk

The Group applies a VaR methodology, which is a statistically based estimate, to measure the potential loss of its trading portfolio from adverse market movements. It expresses as the maximum amount the Group might lose given a certain level of confidence, which for the Group is 99% for a one day holding period. There is therefore a specified statistical probability that actual loss could be greater than the VaR estimate. Hence, the use of VaR does not prevent losses outside the VaR limits in the event of extreme market movements.

The VaR model assumes a certain "holding period" (one day in the case of the Group) until positions can be closed. It is calculated based on the current mark-to-market value of the positions, the historical correlation and volatilities of the market risk factors over an observation period of one calendar year using a method known as historical simulation approach.

The VaR model is continuously validated by back-testing the VaR results for trading positions. All back-testing exceptions are investigated and back-testing results are reported to senior management.

As VaR constitutes an integral part of the Group's market risk control regime, VaR limits are established and reviewed by the Board and its delegated committees at least annually for all trading positions and allocated to business units. Actual exposures, including VaR, are monitored against limits on a daily basis by RMCD. Average daily VaR for the Group for all trading activities during the year was HK\$3,388,000 (2021: HK\$1,379,000).

#### (ii) Stress tests

Stress tests provide an indication of the potential size of losses that could arise in extreme conditions. The stress tests carried out by RMCD include: risk factor stress testing, where stress movements are applied to each risk category; and scenario stress testing, which includes applying possible stress events to specific positions or portfolios. Besides, the expected shortfall of the trading portfolio is measured to evaluate the expected size of extreme trading loss beyond a specified confidence level and over a longer holding period. In addition, reverse-stress tests are performed as a useful tool to evaluate the maximum size of market stress that the Group can endure before hitting the prescribed tolerable levels.

The results of the stress tests are reviewed by the Board and its delegated committees regularly.

## 3.3.2 Market risk arising from the banking book

In the Group's banking book, market risk is predominantly associated with positions in debt and equity securities.

#### (a) Market risk measurement technique

Within the risk management framework and policies established by the Board and its delegated committees, various limits, guidelines and management action triggers are established to control the exposures of the Group's banking book activities to foreign exchange risk, interest rate risk, and price risk. In particular, position and sensitivity limits and price triggers are in place to control the price risk of the investment securities. In addition, sensitivity analysis and stress testing (including reversestress testing) covering shocks and shifts in interest rates on the Group's on- and off-balance sheet positions and credit spreads on the Group's investment securities are regularly performed to gauge the market risk inherent in the Group's banking book portfolios and manage it against the established control measures.

VaR methodology is not used to measure and control the market risk of the banking book.

# (b) Sensitivity analysis of non-trading portfolio

#### (i) Foreign exchange risk

The Group has limited net foreign exchange exposure (except for USD, Macau Pataca ("MOP") and Renminbi ("RMB")) as foreign exchange positions and foreign currency balances arising from customer transactions are normally matched against other customer transactions or transactions with the market. Foreign exchange exposure of the non-trading portfolio in respect of MOP and RMB arise mainly from the operation of overseas subsidiaries in Macau and Mainland China. The net exposure positions including the trading and non-trading portfolios, both by individual currency and in aggregate, are managed by the Treasury and Global Markets Division of the Group on a daily basis within established foreign exchange limits.

若用長期外幣資金融資港元資產,反 之亦然,通常會透過與遠期外匯合約 配對抵銷以減低外匯風險。

於2022年12月31日,倘所有其他變數保持不變而港元對人民幣貶值100個基點,本年度之除稅後溢利及權益將增加27,000,000港元(2021年:增加39,000,000港元),主要受惠於換算人民幣資產時之外匯收益大於換算人民幣負債時之外匯虧損。

相反地,倘所有其他變數保持不變而港元對人民幣升值100個基點,本年度之除稅後溢利及權益將減少27,000,000港元(2021年:減少39,000,000港元)。

Long-term foreign currency funding, to the extent that this is used to fund Hong Kong dollar assets, or vice versa, is normally matched using foreign exchange forward contracts to reduce exposure to foreign exchange risk.

At 31 December 2022, if HK\$ had weakened by 100 basis points against RMB with all other variables held constant, the profit after tax for the year and equity would have been HK\$27 million higher (2021: HK\$39 million higher), mainly as a result that the foreign exchange gain on translation of RMB denominated financial assets outweighed the foreign exchange losses on translation of RMB denominated financial liabilities.

Conversely, if HK\$ had strengthened by 100 basis points against RMB with all other variables held constant, the profit after tax for the year and equity would have been HK\$27 million lower (2021: HK\$39 million lower).

本集團採納用以計量源自銀行賬持倉 的利率風險額之框架與載於香港金 管局之《監管政策手冊》(「《監管政策 手冊》」)內有關銀行賬內的利率風險 (「銀行賬內的利率風險」)之指引一 致。就盈利觀點而言,利率風險乃由 於市場利率變化而導致金融工具源自 未來現金流之淨收入波動之風險。就 經濟價值觀點而言,利率風險則為由 於市場利率變化而導致金融工具之經 濟價值受到不利的影響。本集團就銀 行賬承擔以上兩方面之利率風險。就 此而論,息差或淨利息收入及資本之 經濟價值可能由於此等變化或突如其 來之變化而上升或下跌。董事會及資 產及負債管理委員會(「資產及負債管 理委員會」)就可能承擔之重訂利率錯 配水平設定額度及透過情境分析及壓 力測試定期監控利率變化之影響。

  - (b) Sensitivity analysis of non-trading portfolio (Continued)
    - (ii) Interest rate risk

The framework adopted by the Group to measure interest rate risk exposures arising from its banking book positions is consistent with the guidelines set out by the HKMA in its Supervisory Policy Manual ("SPM") on Interest Rate Risk in the Banking Book ("IRRBB"). From an earnings perspective, interest rate risk is the risk that the net income arising from future cash flows of a financial instrument will fluctuate because of changes in market interest rates. From an economic value perspective, interest rate risk is the risk that the economic value of a financial instrument will undergo adverse impact because of changes in market interest rates. The Group takes on interest rate risk from both perspectives in the banking book. As such, the interest margins or net interest income and the economic value of the capital may increase or decrease as a result of such changes or in the event that unexpected movements arise. The Board and the Asset and Liability Management Committee ("ALCO") set limits on the level of mismatch of interest rate repricing that may be undertaken and monitor the interest rate impacts through scenario analysis and stress testing regularly.

    - (ii) 利率風險(續)

於2022年12月31日,倘所有其他變數保持不變而港元及美元之市場利率於香港金融管理局要求的標準平行向上的情景下平行震盪向上200個基點,對未來12個月之盈利及股權之經濟價值之影響將分別為增加335,000,000港元及減少670,000,000港元(2021年:分別為增加78,000,000港元及減少727,000,000港元)。

上述於2021年及2022年應用在外匯風險及 利率風險之敏感度分析方法及假設基準皆大 致相同。

除了外匯風險及利率風險,本集團之債務證券及權益性證券投資亦面對因其他因素所產生的風險。故此,因應不同的因素包括流動資金風險、市場狀況及其他可能影響個別或組合投資風險敞口之事件,此等投資的價值可以出現重大的變化。

- 3.3 Market risk (Continued)
- 3.3.2 Market risk arising from the banking book (Continued)
  - (b) Sensitivity analysis of non-trading portfolio (Continued)
    - (ii) Interest rate risk (Continued)

At 31 December 2022, if HK\$ and US\$ market interest rates had experienced a 200 basis points parallel up shock under the HKMA's standard parallel up scenario, with other variables held constant, the impact on earnings over the next 12 months and the impact on economic value of equity would have been HK\$335 million higher and HK\$670 million lower respectively (2021: HK\$78 million higher and HK\$727 million lower respectively).

The method and assumptions used in the above sensitivity analysis on foreign exchange risk and interest rate risk are broadly on the same basis for both 2021 and 2022.

In addition to foreign exchange risk and interest rate risk, the Group's investments in debt securities and equity securities are also exposed to risks arising from other factors. Consequently, the value of such investments could change significantly depending on a variety of factors including liquidity risk, market sentiment and other events that might affect individual or portfolios of exposures.

#### 3.3.5 利率基準改革

銀行間同業拆借利率(「銀行間同業拆借利率」)過渡為以替代無風險利率取代銀行間同業拆借利率的準備過程。英國金融行為監管局宣佈將於2023年6月30日後停止由任何管理人提供倫敦銀行間同業拆借利率報價及其代表性。是次過渡影響本集團之未到期衍生工具及利率敏感的資產及負債。

本集團已成立跨部門組成的項目工作組以推動一系列的系統提升,以協助本集團適應包括風險管理範疇的同業拆借利率之過渡。市場風險限額包括及運用市場風險數值(「市場風險數值」)及利率風險敏感性仍然是有效及合理的風險管理。本集團旨於通過系統及流程變更,以達致成功過渡銀行間同業拆借利率之改革。

#### 3.3.5 Interest rate benchmark reform

Inter-bank Offered Rate ("IBOR") transition is the process of preparation for the replacement of the IBOR by alternative risk-free rates. UK Financial Conduct Authority announced that all London Interbank Offered Rate settings will either cease to be provided by any administrator or no longer be representative after 30 June 2023. This transition impacts the Group's outstanding financial derivatives and interest rate sensitive assets and liabilities.

A bankwide project workgroup has been established to push a series of system enhancements in order to accommodate the Group with the IBOR transition, including risk management perspective. Market risk limits such as value-at-risk and interest rate sensitivities are still effective and valid for risk management. The Group aims to put system and process changes in place to help achieving the IBOR transition.

## 3.4 Liquidity risk

Liquidity risk is the risk that the Group is unable to fund increases in assets or meet its payment obligations associated with its financial liabilities when they fall due without incurring unacceptable loss.

## 3.4.1 Liquidity risk management process

The Group manages its liquidity on a prudent basis with the objective to comply with the statutory standards and to ensure that there is an adequate liquidity and funding capacity to meet normal business operations and to withstand severe liquidity stresses. The Group has adopted the Liquidity Maintenance Ratio ("LMR") and the Core Funding Ratio ("CFR") as the regulatory standards specified by the HKMA for reporting on the Group's liquidity position. During the period, the Group had maintained sufficiently high LMR and CFR well above the statutory minimum of 25% and 75% respectively.

Moreover, the Group has maintained a sound liquidity risk management framework in accordance with the HKMA's requirements set forth in the SPM LM-1 on "Regulatory Framework for Supervision of Liquidity Risk" and the SPM LM-2 on "Sound Systems and Controls for Liquidity Risk Management". The SPM LM-1 is to provide the approach adopted by the HKMA for supervising and assessing the liquidity risk of banks while the SPM LM-2 is developed to implement the liquidity sound principles formulated by the Basel Committee on Banking Supervision ("Basel Committee") to strengthen the liquidity risk management standards of banks.

Liquidity risk management is governed by the policy and framework approved by the Board, which delegates to the Group's ALCO to oversee liquidity risk management. The ALCO regularly reviews the Group's loan and deposit mix and changes, funding requirements and projections, and monitors a set of liquidity risk metrics, including the LMR, CFR and maturity mismatch on an ongoing basis. In addition, material changes in the liquidity risk metrics together with any corresponding proposed mitigation actions will be reviewed by ALCO. Appropriate limits or triggers on these risk metrics are set and sufficient liquid assets are held to ensure that the Group can maintain a sufficient level of stable funding to support its asset growth. The Treasury and Global Markets Division is responsible for the day-to-day management of funding and liquidity position while the GRD is responsible for the measurement and monitoring of liquidity risk exposures on a daily and monthly basis, and also conducting liquidity analysis and stress testing. The Financial Control Division handles regulatory reporting in relation to liquidity risk, and coordinates the regular forecast of loans and deposits, and LMR, CFR, budget and analysis relating to liquidity and funding management.

#### 3.4 Liquidity risk (Continued)

#### 3.4.1 Liquidity risk management process (Continued)

The Group places considerable importance to establish a diversified and stable funding. While customer deposits form the primary portion of the Group's funding, certificates of deposit and medium term notes are issued at opportune times in order to lengthen the funding maturity and optimise asset and liability maturities. Short-term interbank deposits are taken on a limited basis with the aim of maintaining the presence in the market and the Group is a net lender to the interbank market.

The monitoring and reporting take the forms of cash flow measurements and projections for different time horizons, including the next day, week and month, which are key periods for liquidity management. The starting point for those projections is an analysis of the contractual maturity of the financial assets and liabilities as well as the expected maturity of these assets and liabilities based on historical observations. The cash flow projections also take into account the historical behaviour of off-balance sheet items, including undrawn lending commitments and contingent liabilities such as standby letters of credit and guarantees. The Group always maintains an adequate liquidity cushion, which is composed of high quality marketable securities with sufficient market depth to meet its liquidity needs at all times, even under adverse market conditions. Eligible securities in the cushion mainly have low risk and simple structure and can be readily sold or used as collateral to obtain funds within a short period of time. Debt securities held are marked to the market on daily basis to ensure their market liquidity.

The Group performs stress testing regularly, which includes an institution-specific crisis scenario, a general market crisis scenario and a combination of these crisis scenarios in order to assess the potential impact on its liquidity position under stressed market conditions. The Group maintains a set of early warning indicators, including qualitative and quantitative factors and involving both internal and market indicators that help identify any emerging risk at an early stage. The Group maintains a contingency plan that sets out its strategies for dealing with liquidity stresses and the procedures for making up cash flow deficits (e.g. conducting repo transactions or liquidation of assets held for liquidity risk management purpose) in emergency situations. An annual drill test is conducted and the contingency plan is reviewed at least annually to ensure it remains sound and effective. Intragroup transactions are conducted on arm's length basis and are treated the same way as other third party transactions for the purpose of cash flow projection under normal scenario. Subsidiaries of the Group are required to manage their liquidity positions to meet their needs under both normal and stressed conditions. Most of the Group's derivative transactions are exchange rate contracts and interest rate contracts. Under the terms of our collateral arrangements with derivative counterparties, collateral movements are not linked with the credit ratings of the Group.

資產與負債期限及利率的相配和受控的錯配對集團管理層十分重要。由於進行的業務交易經常有不確定的期限及不同類別,對銀行而言,完全相配的情況並不普遍。不相配的持倉既可能提高盈利能力,但也會增加虧損風險。

資產與負債的到期日及以合理的成本替代到期之 附息負債的能力,是評估集團流動資金及其因利 率及匯率變動所承擔風險的重要因素。

因集團一般不預期第三方會根據有關協議全數動 用資金,應付擔保和備用信用證項下所需款項的 流動資金需求遠少於承擔的金額。由於很多信貸 承擔於到期或終止日毋須動用資金,因此用於提 供信貸之信貸承擔的未償付合約總金額未必等同 日後的現金需求。 The matching and controlled mismatching of the maturities and interest rates of assets and liabilities are fundamental to the management of the Group. It is unusual for banks to be completely matched, as businesses transacted are often of uncertain term and of different types. An unmatched position potentially enhances profitability, but also increases the risk of losses.

The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature are important factors in assessing the liquidity of the Group and its exposure to changes in interest rates and exchange rates.

Liquidity requirements to support calls under guarantees and standby letters of credit are considerably less than the amount of the commitment because the Group does not generally expect the third parties to fully draw funds under the agreement. The total outstanding contractual amount of commitments to extend credit does not necessarily represent future cash requirements, as many of these commitments will expire or terminate without being funded.

#### 3.5 金融資產及負債之公平值

#### (甲) 公平值之釐定

公平值受限於須由董事會負責確保本集團有適當的估值管治及控制程序之控制框架。董事會授權財資及投資風險委員會監管金融工具之估值程序。估值由風險管理及監控部和獨立專業合資格估值師(如適用)獨立地進行,而估值結果乃定期驗證,確保公平值計量過程之完整性。

金融工具之公平值乃在目前市場情況下市場 參與者於計量日進行之有序交易中出售資產 所收取或轉移負債所支付之價格,不論該價 格為直接可觀察或使用估值方法估計。

#### 3.5 Fair values of financial assets and liabilities

# (a) Determination of fair value

Fair values are subject to a control framework that the Board is held responsible for ensuring proper valuation governance and control processes of the Group. It delegates the responsibility for overseeing the valuation process for financial instruments to the TIRC. Valuation is performed independently by RMCD and where appropriate, by independent and professionally qualified valuers and the valuation results are periodically verified to ensure the integrity of the fair value measurement process.

The fair value of financial instruments is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions regardless of whether that price is directly observable or estimated using a valuation technique.

# 3. 財務風險管理(續)

#### 3.5 金融資產及負債之公平值(續)

#### (甲)公平值之釐定(續)

凡金融工具之報價隨時且定期由交易所、交易商、經紀人、行業組織、定價服務及監管機構發佈,則被視作為活躍市場報價之金融工具。於活躍市場之報價為公平值提供最可靠之證據,並須於可獲得時使用。倘金融資產或金融負債有買入價及賣出價,本集團將採用買賣差價中在該等情況下最能代表公平值之價格。

倘金融工具之可觀察市場報價未能直接獲得,本集團利用合適及獲廣泛認可之估值方法估計該等金融工具之公平值,包括現值方法及標準期權定價模型。於應用該等金融工具之估值方法時,本集團盡最大限度使用相關可觀察依據(例如:利率、匯率、波動性、信貸息差),而盡最少限度使用不可觀察依據。例如利率掉期合約之公平值按估計的未來現金流之現值計算。遠期外匯合約之公平值一般根據現行遠期匯率計算,而期權合約之公平值則按合適之定價模型計算,如Black-Scholes模型。

本集團使用外間報價及其本身信貸息差,以 釐定其金融負債及已選擇以公平值計量之其 他負債之現值。倘本集團之信貸息差擴闊, 負債之價值下降,本集團會確認該等負債之 收益。倘本集團之信貸息差收窄,負債之價 值上升,本集團會確認相對該等負債之虧 損。

如有需要,用於計量程序之價格數據及參數 會被仔細覆核及調整才應用,其中尤其需要 考慮當前的市場發展情況。

# 3. FINANCIAL RISK MANAGEMENT (Continued)

#### 3.5 Fair values of financial assets and liabilities (Continued)

#### (a) Determination of fair value (Continued)

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency. A quoted price in an active market provides the most reliable evidence of fair value and shall be used whenever available. If a financial asset or a financial liability has a bid price and an ask price, the price within the bid-ask spread that is most representative of fair value in the circumstances is used by the Group.

Where observable market quotation of financial instruments is not directly available, the Group estimates the fair value of such financial instruments by using appropriate valuation techniques that are widely recognised including present value techniques and standard option pricing models. In applying valuation techniques for these financial instruments, the Group maximises the use of relevant observable inputs (for examples, interest rates, foreign exchange rates, volatilities, credit spreads) and minimises the use of unobservable inputs. For example, the fair value of interest-rate swaps is calculated as the present value of the estimated future cash flows, the fair value of foreign exchange forward contracts is generally based on current forward rates and the fair value of option contracts is derived using appropriate pricing models, such as Black-Scholes model.

The Group uses external price quotes and its own credit spreads in determining the current value of its financial liabilities and other liabilities for which it has elected the fair value option. When the Group's credit spreads widen, the Group recognises a gain on these liabilities because the value of the liabilities has decreased. When the Group's credit spreads narrow, the Group recognises a loss on these liabilities because the value of the liabilities has increased.

Price data and parameters used in the measurement process are reviewed carefully and adjusted, if necessary, to take consideration of the current market developments.

#### (b) Fair value hierarchy

The Group measures fair values using the following hierarchy that reflects the significance of the observable and unobservable inputs used in the fair value measurement:

#### Level Descriptions

- 1 Quoted prices (unadjusted) in active markets for identical assets or liabilities. This level includes equity securities and derivatives that are listed on exchanges.
- Inputs other than quoted prices included within Level
  that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). This level includes the majority of the OTC derivative contracts. These are financial instruments with quoted prices for similar instruments in active markets or quoted prices for identical or similar instruments in inactive markets and financial instruments valued using models where all significant inputs are observable.
- Inputs for the asset or liability that are not based on observable market data (unobservable inputs). This level includes equity and debt securities with significant unobservable components.

界定為第3級別資產之金融資產為非上市權益性證券。這些投資為本集團以往申請加入由有關機構運作之國際金融通訊、跨境支付、信用卡發行等合作協議時以提供有關銀行服務為由購入。

非上市權益性證券以通過市場可比較的公司、股息折現模型及折現現金流模型的估值方式計量。重要的不可觀察重要參數為可比較的上市公司的平均市帳率、股息增長率,及股息折現模型內的股本成本。倘所有重要的不可觀察參數有利地變更5%或不利地變更5%,本集團的全面收益將分別增加50.000,000港元,及減少45,000,000港元。

截至2022年12月31日及2021年12月31日止年度,概無金融資產及負債之其他轉入或轉出公平值等級中的第1、第2及第3級別。賬面值之變動為重估收益/虧損。於年內並無新增或出售。

# 3.5 Fair values of financial assets and liabilities (Continued)

#### (b) Fair value hierarchy (Continued)

Assets and liabilities measured at fair value: (Continued)

#### Recurring fair value measurements (Continued)

Financial assets classified as Level 3 assets represent investments in shares issued by unlisted entities. These investments were acquired some years ago when the Group applied to join the platforms or cooperative arrangements operated by the relevant entities in areas such as international financial messaging, cross-border payments, credit cards issuance, etc. which are essential to the provision of banking services by the Group.

The unlisted equity investments are measured using valuation techniques of market comparable companies, dividend discount model and discounted cash flow model. The significant unobservable inputs are the average price-to-book ratio ("PB ratio") of the comparable listed companies, the dividend growth rate and cost of equity used in the dividend discount model, and the discount rate and dividend yield used in the discounted cash flow model. If all of the significant unobservable inputs favourably changed and unfavourably changed by 5%, the Group's other comprehensive income would have increased by HK\$50 million and decreased by HK\$45 million respectively.

For the year ended 31 December 2022 and 31 December 2021, there were no transfers of financial assets and liabilities into or out of the Level 1, Level 2 and Level 3 fair value hierarchy. The changes in carrying value represent the revaluation gains/losses during the year. There was no addition and disposal during the year.

#### 3.5 金融資產及負債之公平值(續)

#### (丙) 未按公平值計量之金融工具

下列方法和重要假定之應用,以釐定如下呈 報的金融工具的公平價值:

#### (i) 在銀行的存款

在銀行的浮息存款及隔夜存款之公平 值乃其賬面值。固定利息存款之估計 公平值乃根據附有同類信貸風險及剩 餘到期日之債務以當前貨幣市場利率 計算之貼現現金流。

#### (ii) 客戶貸款及墊款,及貿易票據

貸款及墊款及貿易票據之估計公平值 指預計未來將會收回的現金流之貼現 數額。預計現金流按現行市場利率貼 現以釐定公平值。

# (iii) 證券投資

證券投資包含包括在攤餘成本類別之 附息資產。攤餘成本資產之公平值乃 依據市場價格或經紀/交易商報價。 倘未有此等資料,公平值之計量乃採 用附有相同信貸、到期日及收益等特 性的證券市場之報價。

# (iv) 銀行存款及結餘、客戶存款、 已發行的存款證及其他借入資 金

無註明到期日之存款,包括不附息存款,其公平值為即時付還之數額。未有活躍市場報價之固定利息存款及其他借款,其公平值之計量乃根據採用附有相同剩餘到期日之新債務息率計算之貼現現金流。

# 3. FINANCIAL RISK MANAGEMENT (Continued)

#### 3.5 Fair values of financial assets and liabilities (Continued)

#### (c) Financial instruments not measured at fair value

The following methods and significant assumptions have been applied in determining the fair values of financial instruments presented below:

#### (i) Placements with banks

The fair value of floating rate placements and overnight deposits is their carrying amount. The estimated fair value of fixed interest bearing deposits is based on discounted cash flows using prevailing money-market interest rates for debts with similar credit risk and remaining maturity.

#### (ii) Loans and advances to customers, and trade bills

The estimated fair value of loans and advances and trade bills represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value.

#### (iii) Investment securities

Investment securities include interest-bearing assets included in the amortised cost category. Fair value of amortised cost assets is based on market prices or broker/dealer price quotations. Where this information is not available, fair value is estimated using quoted market prices for securities with similar credit, maturity and yield characteristics.

# (iv) Deposits and balances from banks, deposits from customers, certificates of deposit issued and other borrowed funds

The estimated fair value of deposits with no stated maturity, which includes non-interest bearing deposits, is the amount repayable on demand. The estimated fair value of fixed interest-bearing deposits and other borrowings not quoted in an active market is based on discounted cash flows using interest rates for new debts with similar remaining maturity.

#### 3.6 Capital management

The Group's objectives when managing capital are:

- To comply with the capital requirements set by the banking regulators in the markets where the entities within the Group operate;
- To safeguard the Group's ability to continue its business as a going concern;
- To maximise returns to shareholders and optimise the benefits to other stakeholders; and
- To maintain a strong capital base to support the development of its business.

Capital adequacy of and the use of regulatory capital are monitored regularly by the Group's management, employing techniques based on the guidelines developed by the Basel Committee, as implemented by the HKMA, for supervisory purposes. The required information is filed with the HKMA on a quarterly basis.

Under the regulatory framework in Hong Kong, the Bank is required to meet three capital ratios, namely, the Common Equity Tier 1 capital, Tier 1 capital and Total capital respectively against risk-weighted assets. The internationally agreed minimum of these three ratios are set at 4.5%, 6.0% and 8.0% respectively and are adopted by the HKMA. In order to comply with HKMA's requirements as stated in the SPM CA-G-5 on "Supervisory Review Process", the Bank is required to set further buffers, to reflect material risks not included in the minimum regulatory capital calculation, arising from regulator's requirements, internal assessment of risks and the results of stress tests under the Pillar II capital requirement. In addition, the Bank is required to fulfil the capital conservation buffer and countercyclical capital buffer requirements set by the HKMA. Likewise, the Leverage Ratio forms part of Basel III implementation and the required information is submitted by the Bank to the HKMA on quarterly basis. In line with the international standards, the minimum Leverage Ratio is set at 3% by the HKMA.

#### 3.6 資本管理(續)

風險加權數額包括資產負債表內及外之信貸風險、市場風險和操作風險之風險加權數額合計。 資產負債表內風險根據債務人或各類風險性質分類及依據香港金管局認可之外部信貸評級機構指定的信貸評級或其他載於《銀行業(資本)規則》之原則且已考慮減輕信貸風險對資本之影響來確定其風險加權值。資產負債表外風險在未被分類及風險加權計算前,已應用各項風險之相關信貸換算系數換算其為信貸等值額,猶如當作其乃資產負債表內風險。

包括在綜合資產負債表之資本餘額,其主要構成為股本、保留溢利、其他權益性工具及其他儲備。《銀行業(資本)規則》並容許資本包括綜合撥備及監管儲備。

本集團管理層定期按澳門金融管理局(「澳門金管局」)及中國銀行及保險監督管理委員會(「中國銀保監會」)就監管用途發出的指引之方法,監控集團之澳門附屬銀行澳門商業銀行及中國附屬銀行大新銀行(中國)之資本充足度及法定資本之使用。

澳門商業銀行及大新銀行(中國)分別向澳門金管局及中國銀保監會按季度呈報所需資料。澳門金管局規定澳門商業銀行以及中國銀保監會規定大新銀行(中國)各須維持其自有資本或資本基礎對風險加權總額之比率(即資本充足比率)不低於法定要求之最低水平8%。

本集團若干非銀行附屬公司亦須遵循其他監管機構(例如:證券及期貨事務監察委員會)之法定資本規定。

# 3.7 受託業務

本集團提供託管人、受託人、財富管理及諮詢服務予第三者,當中涉及本集團就不同之金融工具作出分配及買賣決定。此等以受信身份持有之資產,並不列入本集團之綜合財務報表。此等服務可引致本集團被追索錯誤管理之風險。

# 3. FINANCIAL RISK MANAGEMENT (Continued)

#### 3.6 Capital management (Continued)

Risk-weighted amount is the aggregate of the risk-weighted amounts for credit risk, market risk and operational risk, and covers both on-balance sheet and off-balance sheet exposures. On-balance sheet exposures are classified according to the obligor or the nature of each exposure and risk-weighted based on the credit assessment rating assigned by an external credit assessment institution recognised by the HKMA or other rules as set out in the Banking (Capital) Rules, taking into account the capital effects of credit risk mitigation. Off-balance sheet exposures are converted into credit-equivalent amounts by applying relevant credit conversion factors to each exposure, before being classified and risk-weighted as if they were on-balance sheet exposures.

The principal forms of capital included in the balances on the consolidated balance sheet are share capital, retained profits, other equity instruments and other reserves. Capital also includes collective provisions and regulatory reserve for general banking risks as allowed under the Banking (Capital) Rules.

Capital adequacy of and the use of regulatory capital by the Group's Macau banking subsidiary, BCM, and banking subsidiary in China, DSB China, are monitored regularly by the Group's management, employing techniques based on the guidelines provided by the Autoridade Monetária de Macau ("AMCM") and the China Banking and Insurance Regulatory Commission ("CBIRC") respectively for supervisory purposes.

The required information is filed by BCM with the AMCM and by DSB China with the CBIRC on a quarterly basis. The AMCM requires BCM and the CBIRC requires DSB China to maintain a ratio of own funds or capital base to total risk-weighted exposures (i.e. the capital adequacy ratio) not lower than the required statutory minimum of 8%.

Certain non-banking subsidiaries of the Group are also subject to statutory capital requirements from other regulatory authorities, such as the Securities and Futures Commission.

#### 3.7 Fiduciary activities

The Group provides custody, trustee, wealth management and advisory services to third parties, which involve the Group making allocation and purchase and sale decisions in relation to a variety of financial instruments. Those assets that are held in a fiduciary capacity are not included in the consolidated financial statements. These services could give rise to the risk that the Group could be accused of maladministration.

# 4. 應用會計政策時之重要會計估計及 判斷

本集團作出之估計及假設將會影響下一財政年度 內列報資產及負債之金額。本集團會根據過往經 驗及其他因素,包括在某些情況下,對未來事項 作出認為是合理的預期,並持續地評估所作出之 估計及判斷。估計及假設之改變可能對本集團之 作出改變之期內業績有重大影響。選擇及應用用 同之估計及假設和其後之變化,可能影響本集 將來之溢利及淨資產值。本集團依據高層次 將來之溢利及淨資產值。本集團依據高層次 其主要會計估計及假設之改變對本集團呈報之 產及負債之敏感度影響後,深信所採納之估計及 假設乃屬合適和合理,及呈列在本集團之綜合 務報表內之財務業績和狀況在所有重要性方面是 公平及合理。

#### (甲)預期信貸虧損準備的計量

按攤餘成本計量及以公平值計量且其變動計入其他全面收益之金融資產的預期信貸虧損準備的計量乃是需要應用複雜模型及有關未來經濟狀況和信貸行為(例如客戶違約之可能性及引致之損失)的重大假設之範疇。用以解釋計量預期信貸虧損的參數、假設及估計方法在附註3.2.2中進一步詳細說明,其中還列出了預期信貸虧損對這些要素變化的主要敏感度。

應用會計規定以計量預期信貸虧損需要若干重大 判斷,例如:

- 釐定信貸風險大幅增加之準則;
- 選擇合適之模式及假設以用作計量預期信貸 虧損;
- 就各類產品/市場建立前瞻性情境數目及相對加權值相關的預期信貸虧損;及
- 建立相近類別金融資產的組別作計量預期信貸虧損用途。

有關本集團於上述範疇作出的判斷及估計的詳細 資料載於附註3.2.2。

# 4. CRITICAL ACCOUNTING ESTIMATES, AND JUDGEMENTS IN APPLYING ACCOUNTING POLICIES

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Changes in estimates and assumptions may have a significant impact on the results of the Group in the periods when changes are made. The application and selection of different estimates and assumptions, and their subsequent changes, could affect the Group's profit and net asset value in the future. The Group, based on its high-level assessment of the sensitivity impacts on the reported assets and liabilities of the Group arising from the changes in critical accounting estimates and assumptions, believes that the estimates and assumptions adopted are appropriate and reasonable, and the financial results and positions presented in the consolidated financial statements are fair and reasonable in all material respects.

#### (a) Measurement of the ECL allowance

The measurement of the ECL allowance for financial assets measured at amortised cost and FVOCI is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g. the likelihood of customers defaulting and the resulting losses). Explanation of the inputs, assumptions and estimation techniques used in measuring ECL is further detailed in Note 3.2.2, which also sets out key sensitivities of the ECL to changes in these elements.

A number of significant judgements are also required in applying the accounting requirements for measuring ECL, such as:

- Determining criteria for significant increase in credit risk;
- Choosing appropriate models and assumptions for the measurement of ECL;
- Establishing the number and relative weightings of forwardlooking scenarios for each type of product/market and the associated ECL; and
- Establishing groups of similar financial assets for the purposes of measuring ECL.

Detailed information about the judgements and estimates made by the Group in the above areas is set out in Note 3.2.2.

# **4.** 應用會計政策時之重要會計估計及 判斷(續)

#### (乙)金融工具之公平值

本集團按公平值列賬之債務證券投資大部份是依據公開之市場報價計量。本集團在採納經判斷為最恰當報價作估值價時,根據其參考對一系列可觀察到之報價、近期之交易價、報價來源之可信性和素質、及相同類別證券價格之評估。對於非上市權益性投資,需要管理層之判斷和估計以選擇合適的估值參數、假設及模型方法。

於呈報日之金融工具之公平值的賬面值載於附註 18、19及21。

# (丙) 商譽及無形資產之減值

於業務合併中,繼初始確認商譽及無形資產後, 任何有關用於無形資產未來可產生收益之假設之 重大變動,包括被收購之企業之未來收益現金流 量,或因市場環境及前景的重大改變而影響貼現 率,將對此資產之賬面價值作出調整。倘在某些 情況下,無形資產及商譽預期可收回之金額較其 賬面價值為低,則須確認該資產的減值。

於呈報日之商譽及無形資產的賬面值載於附註25。

# (丁) 投資於聯營公司,重慶銀行(「重慶銀行」)之減值評估

本集團根據香港會計準則第36號《資產減值》對於 重慶銀行之投資進行定期減值評估。

該評估就投資之賬面值比較管理層估量之使用價值與扣除出售費用後之公平值比較之高者。使用價值乃管理層根據管理層及可觀察之數據導出之某些假設的貼現現金流量估算。該估量涉及應用管理層之判斷並敏感於貼現率之假設和源自持有該投資及其最終出售之現金流量。

# 4. CRITICAL ACCOUNTING ESTIMATES, AND JUDGEMENTS IN APPLYING ACCOUNTING POLICIES (Continued)

# (b) Fair value of financial instruments

A majority of the Group's investments in debt securities carried at fair value are valued based on observable market quotations. The Group applies judgement in selecting the most appropriate quotation for valuation purposes based on its assessment of the range of observable quotations, recent observable transactions, the reliability and quality of the pricing source, and the value of securities of a similar nature. For unlisted equity investments, management judgement and estimates are required for the selection of appropriate valuation parameters, assumptions and modelling techniques.

The carrying amounts of the financial instruments measured at fair value at reporting date are shown in Note 18, 19 and 21.

#### (c) Impairment of goodwill and intangible asset

For business combinations, subsequent to initial recognition of goodwill and intangible assets, any major change in the assumptions in relation to future benefits to be generated from the intangible assets, including future cash flow of benefits to be generated from the acquired entities, or discount rates which could be caused by major changes in market conditions and outlook, could result in adjustments to the carrying values of such assets. In the event that the expected recoverable amounts of goodwill and intangible assets are significantly lower than their carrying values, impairment of such assets would have to be recognised.

The carrying amounts of goodwill and intangible asset at reporting date are shown in Note 25.

# (d) Impairment assessment of the investment in an associate, Bank of Chongqing ("BOCQ")

The Group carries out periodic impairment assessments on its investment in BOCQ in accordance with HKAS 36 "Impairment of assets"

This assessment compares the carrying value of the investment against the higher of management's estimate of value in use and fair value less costs of disposal. Management's estimate of the value in use is based on a discounted cash flow projection which contains certain assumptions derived from management and observable market information. This estimate is subject to application of management judgement and is sensitive to assumptions on the discount rate and the cash flows arising from the holding of this investment and from its ultimate disposal.

# **4.** 應用會計政策時之重要會計估計及 判斷(續)

# (丁) 投資於聯營公司,重慶銀行(「重慶銀行)之減值評估(續)

於2022年12月31日,管理層估量之使用價值低於其在重慶銀行之投資的賬面值。因此,於截至2022年12月31日止年度,本集團在重慶銀行之投資之賬面值已減值1,683,000,000港元(2021年:726,000,000港元)。

#### (戊) 租賃期之釐定

釐定租賃期時,管理層須考慮所有可引起經濟誘 因以行使延長選擇權,或不行使終止選擇權之事 實及情況。延長選擇權(或終止選擇權後之期間) 只有在該租賃可合理地被確定會延長(或不終止) 下方包括在租賃期內。

就物業租賃而言,下列因素一般至為相關:

- 倘若終止(或不延長)有重大罰金,本集團一般會合理地確定延長(或不終止)。
- 倘若任何裝修預計會有重大剩餘價值,本集 團一般會合理地確定延長(或不終止)。
- 否則,本集團會考慮其他因素包括過往之租 賃時間及更換租賃資產所需之開支和對業務 之擾亂。

由於本集團可以無需重大開支或擾亂業務下更換 租賃資產,物業租賃中之延長選擇權大多沒有包 括在租賃負債。

倘若選擇權真的被行使(或不行使)或本集團轉為不得不行使(或不行使)該選擇權,則會重新評估租賃期。只有發生一宗影響評估的重大事件或環境重大變更,且在承租人可控制之範圍內,方會修訂可合理地確定之評估。本財政年度內,本集團並無行使任何延長或終止選擇權。

於呈報日之使用權資產的賬面值載於附註27。

# 4. CRITICAL ACCOUNTING ESTIMATES, AND JUDGEMENTS IN APPLYING ACCOUNTING POLICIES (Continued)

# (d) Impairment assessment of the investment in an associate, Bank of Chongqing ("BOCQ") (Continued)

As at 31 December 2022, management's estimate of the value in use is lower than the carrying value of its investment in BOCQ. As a result, in the year ended 31 December 2022, the carrying amount of the Group's investment in BOCQ has been written down by HK\$1,683 million (2021: HK\$726 million).

#### (e) Determination of the lease term

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

For leases of properties, the following factors are normally the most relevant:

- If there are significant penalties to terminate (or not extend), the Group is typically reasonably certain to extend (or not terminate).
- If any leasehold improvements are expected to have a significant remaining value, the Group is typically reasonably certain to extend (or not terminate).
- Otherwise, the Group considers other factors including historical lease durations and the costs and business disruption required to replace the leased asset.

Most extension options in property leases have not been included in the lease liability, because the Group could replace the assets without significant cost or business disruption.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Group becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee. During the current financial year, the Group has not exercised any extension or termination options.

The carrying amounts of right-of-use assets at reporting date are shown in Note 27.

# (己)確認終止香港人壽保險分銷協議時之收 入

於2022年7月8日,本集團宣佈已終止大新銀行、 泰禾人壽保險有限公司(「泰禾人壽」)及泰禾服務 有限公司於2017年6月19日訂立之香港分銷協議。

根據香港分銷協議,大新銀行獲現稱泰禾人壽委任為其非獨家保險代理於香港分銷人壽保險產品:及泰禾人壽為大新銀行於香港的人壽保險產品獨家供應商,以向大新銀行零售客戶進行分銷,分別為期15年。大新銀行已收取1,972,000,000港元的預付款項作為代價,泰禾人壽並同意向大新銀行支付共十筆每筆金額為52,800,000港元的等額遞延支付款項。

於終止香港分銷協議前,預付款項以及已付及未付的遞延支付款項的會計處理為將其全額作遞延收益入賬並於合約期內予以攤銷為收入。於香港分銷協議終止後,有關未攤銷的餘額將不再予以攤銷。

於截至2022年12月31日止年度的財務報告,本集團已確認終止香港人壽保險分銷協議時未攤銷的預付款及遞延支付金額合共1,394,149,000港元為收入。於採取此會計處理的評核中,管理層已參考不限於終止香港人壽保險分銷協議有關的法律意見及其他後續之事態發展。

# (庚)關於未攤銷之預付款項及遞延支付款項 確認為收入的稅務狀況

於本集團於2017年6月19日宣佈簽訂香港分銷協議時,香港分銷協議之意向為大新銀行及泰禾人壽之間的獨家及長期的銀保合作關係。管理層經評核協議有關之預付款項及遞延支付款項後,有關款項最終可以以資本性質處理以作税務用途。管理層在編製2022年年度財務報表時已考慮這一點。

# 4. CRITICAL ACCOUNTING ESTIMATES, AND JUDGEMENTS IN APPLYING ACCOUNTING POLICIES (Continued)

# (f) Recognition of income upon termination of the Hong Kong Distribution Agreement

On 8 July 2022, the Group announced that it had terminated the Hong Kong Distribution Agreement ("HKDA") entered into amongst DSB, Tahoe Life Insurance Company Limited ("Tahoe Life") and Tahoe Services Limited on 19 June 2017.

Under the HKDA, DSB was appointed by Tahoe Life as its non-exclusive insurance agent for distribution of life insurance products in Hong Kong; and Tahoe Life became DSB's exclusive supplier of life insurance products in Hong Kong for its retail customers each for a period of 15 years. In consideration, DSB was paid an upfront payment in the amount of HK\$1,972,000,000 and Tahoe Life agreed to pay ten equal annual deferred payments in the amount of HK\$52,800,000 each to DSB.

Prior to the termination of the HKDA, the accounting treatment for the upfront payment and the paid and unpaid deferred payments was to record them as deferred income for amortisation to income over the contract term. Upon termination of the HKDA, the remaining unamortised part of this amount ceased to be amortised.

In the annual financial statements for the year ended 31 December 2022, the Group has recognised the unamortised upfront payment and deferred payments upon termination of the HKDA totalling HK\$1,394,149,000 as income. In the assessment for adopting this accounting treatment, management has made reference to, amongst others, legal advice relating to the termination of the HKDA and other subsequent development.

# (g) Tax position relating to the unamortised upfront payment and deferred payments recognised as income

As announced by the Group when the HKDA was entered into on 19 June 2017, the HKDA was intended to be an exclusive, long-term bancassurance cooperation between DSB and Tahoe Life. Management assessed that the upfront fee and deferred payments received and receivable by DSB under the HKDA can be treated substantially as capital in nature for tax purpose. Management has taken this consideration into account in the preparation of the 2022 annual financial statements.

本銀行須以監管儲備形式維持除香港財務報告準則所須以外之最低減值撥備。維持該監管儲備(儲備計及澳門商業銀行及大新銀行(中國))乃為符合香港銀行業條例及以審慎監管為目的之本地監管規定。該監管儲備規限可派發予股東之儲備金額。監管儲備之變動須與香港金管局進行諮詢,並直接於權益儲備內調撥。

於2022年12月31日,本銀行已指定438,466,000港元 (2021年:432,194,000港元)之金額作為監管儲備先抵 銷其綜合一般儲備,餘額再從本銀行之綜合保留盈利中 指定。 Note:

The Bank is required to maintain minimum impairment provisions in excess of those required under HKFRS in the form of regulatory reserve. The regulatory reserve, which also covers BCM and DSB China, is maintained to satisfy the provisions of the Hong Kong Banking Ordinance and local regulatory requirements for prudential supervision purposes. The regulatory reserve restricts the amount of reserves which can be distributed to shareholders. Movements in the regulatory reserve are made directly through equity reserve and in consultation with the HKMA.

As at 31 December 2022, the Bank has earmarked a regulatory reserve of HK\$438,466,000 (2021: HK\$432,194,000) first against the consolidated general reserve; and for any excess amount, the balance is earmarked against the consolidated retained earnings of the Bank.

## (乙) 投資之減值測試及於**2022**年確認之減 值

於2022年12月31日,本集團在重慶銀行之投資之公平值已低於賬面值大約9年。為此,本集團持續對在重慶銀行之投資之賬面值進行減值測試以評估可收回金額。

減值測試比對以計算使用價值(「使用價值」) 而釐 定之重慶銀行可收回金額和該投資之賬面值。使 用價值乃按照管理層估量之重慶銀行盈利和未來 將派股息,及經考慮重慶銀行中期和長期之增長 及資產淨值後之預期未來的可能脱手價值,應用 貼現現金流量預測計算。應用於使用價值計算之 貼現率乃參考可於公開市場獲取之重慶銀行股本 成本而估算。

進行使用價值計算以得出該投資之可收回金額 時,本集團考慮所有相關因素包括市場觀點及質 化因素以確保計算使用價值之參數合適。調整亦 須作出以反映影響重慶銀行之最新情況及對預測 重慶銀行未來表現有關之中期及長期市場展望。 在估算重慶銀行之未來現金流當中需要管理層作 重要判斷。

# (b) Impairment testing on the investment and impairment recognised in 2022

At 31 December 2022, the fair value of the Group's investment in BOCQ had been below the carrying amount for approximately 9 years. On this basis, the Group continues to perform an impairment test on the carrying amount of the investment in BOCQ to assess the recoverable amount.

The impairment test is performed by comparing the recoverable amount of BOCQ, determined by a value in use ("VIU") calculation, with the carrying amount of the investment. The VIU calculation uses discounted cash flow projections based on management's estimates of BOCQ's earnings and dividends to be paid in future, and the estimated probable exit value in future after considering the growth of BOCQ and its net asset value for the medium and longer term. The discount rate applied to the VIU calculation was estimated with reference to BOCQ's cost of equity, which is publicly available in the market.

In performing the VIU calculation to arrive at the recoverable amount of the investment, the Group considers all relevant factors including market views and qualitative factors to ensure that the inputs to the VIU calculation are appropriate. Adjustments need to be made to reflect the latest situation affecting BOCQ and also market outlook for the medium and longer term that are relevant in projecting BOCQ's future performance. Significant management judgement is required in estimating the future cash flows of BOCQ.

#### 23. 聯營公司投資(續)

# (乙) 投資之減值測試及於**2021**年確認之減值(續)

根據截至2022年12月31日之狀況並已考慮上述重大參數的敏感度和參數之間可能的互動反應而進行之評估,經計算後之使用價值及經考慮所有相關因素(已包括截至2021年12月31日已確認之累計減值計提)和估值參數後而釐定之可收回金額仍然低於賬面值。本集團就2022年12月31日之狀況進行最新減值測試,認為經計算使用價值後之可回收金額評估為低於扣除截至2021年12月31日之累計減值計提2,992,000,000港元後之賬面值,及有關減值金額為1,683,000,000港元。因此,於2022年年度確認新增減值撥備1,683,000,000港元以調低該投資之價值至2,159,000,000港元。

計算本銀行之資本充足比率並無包括該投資之保留盈利,惟本銀行收取重慶銀行之現金股息除外。倘若該投資維持等於或高於初始投資成本之1,213,000,000港元,該投資之減值將不影響本銀行之資本充足比率。

## 23. INVESTMENT IN AN ASSOCIATE (Continued)

# (b) Impairment testing on the investment and impairment recognised in 2022 (Continued)

Based on the assessment conducted for the position up to 31 December 2022, which takes into account the sensitivity of the key inputs shown above and the effects of possible interaction of these inputs, the recoverable amount, as determined by the VIU calculation and after considering all relevant factors (including the cumulative impairment charge having been recognised as of 31 December 2021) and valuation inputs, remained below the carrying amount. The latest impairment test performed by the Group for the position as at 31 December 2022 concludes that the recoverable amount, based on the VIU calculation, is assessed as lower than the carrying amount, after deducting the cumulative impairment allowance made up to 31 December 2021 of HK\$2,992 million, by HK\$1,683 million. As a result, an additional impairment charge of HK\$1,683 million was recognised in the year of 2022 to reduce the value of the investment to HK\$2,159 million at 31 December 2022.

The calculation of the Bank's capital adequacy does not include the retained earnings from the investment, except for BOCQ cash dividend received by the Bank. Provided that the investment continues to be held at or above the original cost of the investment of HK\$1,213 million, impairment made on the investment does not affect the Bank's capital adequacy.

#### 25. GOODWILL AND INTANGIBLE ASSETS (Continued)

#### (a) Impairment testing on goodwill and intangible assets

Impairment testing in respect of goodwill is performed annually by comparing the recoverable amount of CGU determined based on value in use calculation. The calculations use discounted cash flow projections prepared by the Senior Management based on the latest 5-year business plan, taking into account projected annual growth rate of net profit, and in perpetuity with 2% constant growth rate after the fifth year. The 5-year business plan was developed by the Senior Management based on their evaluation of the businesses and associated projected discounted cash flow of net profit of the relevant CGU and the conditions in which such businesses will operate over the projection period. The discount rate used is based on the Group's weighted average cost of capital at 11.10% (2021: 11.12%).

For trade name, impairment testing is performed annually using pretax royalty rate of 3% with reference to similar business transactions, projected revenue in the medium-term plan, and in perpetuity after the fifth year. The discount rate of 11.10% (2021: 11.12%) used is based on the Group's weighted average cost of capital.

Impairment testing in respect of club debentures is performed annually by comparing the book value of each club debenture with its market value. Impairment loss is recognised when the market value is below the book value.

No impairment losses on goodwill, trade name and club debentures were identified in the year (2021: Nil).

#### (iii) 本集團之租賃活動及其如何入賬

本集團租賃各項物業。於2021年及2022年,租賃合同一般為1年至9年之固定期限 但可能附帶如下列(iv)載述之延長選擇權。

租賃期按個別情況商議及包含多方面之不同條款及條件。除出租人持有租賃之資產之擔保權益外,租賃合同並不強加任何契約。租賃之資產也許不能於借貸用途上用作擔保物。

#### (iv) 延長及終止選擇權

延長及終止選擇權包括在本集團簽訂之若干物業租賃內。就本集團管理於營運中使用之資產而言,使用該等條款可達致最佳營運靈活性。大多數持有之延長及終止選擇權只可由本集團而非各出租人行使。

The total cash outflow for leases in 2022 was HK\$157,077,000 (2021: HK\$199,800,000).

# (iii) The Group's leasing activities and how these are accounted for

The Group leases various properties. Rental contracts are typically made for fixed periods of 1 year to 9 years for 2021 and 2022, but may have extension options as described in (iv) below.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

#### (iv) Extension and termination options

Extension and termination options are included in a number of property leases across the Group. These are used to maximise operational flexibility in terms of managing the assets used in the Group's operations. The majority of extension and termination options held are exercisable only by the Group and not by the respective lessor.

#### 計量投資物業之公平值

本集團於2022年及2021年12月31日為投資物業的價值進行了重估。此評估由獨立專業特許測量師第一太平戴維斯(估值及專業顧問)有限公司為位於香港及中國國內之投資物業及第一太平戴維斯(澳門)有限公司為位於澳門之投資物業按直接比較方法或收入現值資產化方法以可參考之相似物業其近期成交紀錄來進行。在評定投資物業的價值時,其中一項主要依據為經考慮時間、地點及個別因素如樓宇的大小及樓層所確定的銷售單位價格。銷售單位價格的下降會導致投資物業之公平值計量有相應百分比的減少,反之亦然。

市場價值為物業之估值基礎,其與香港財務報告 準則第13號《公平值計量》中之公平值定義一致及 已計入就市場參與者而言之最高和最佳的物業用 途。

#### Fair value measurement of investment properties

The Group's investment properties were last revalued at 31 December 2022 and 2021 by adopting the direct comparison approach or the income capitalisation approach. Under direct comparison approach, valuation is referenced to recent transactions for similar premises as far as practicable by independent, professionally qualified valuer Savills (Valuation and Professional Services) Limited for investment properties in Hong Kong and Mainland China, and by Savills (Macau) Limited for investment properties in Macau. The key inputs was the unit sale rate taking into account of time, location, and individual factors such as size and levels of buildings. A decrease in unit sale rate would result in decrease in fair value measurement of the investment properties by the same percentage and vice versa.

The basis of the valuation of property was market value which is consistent with the definition of fair value under HKFRS 13 "Fair Value Measurement" and takes into account the highest and best use of the property from the perspective of market participants.

#### Fair value measurement of investment properties (Continued)

Investment properties are measured at fair value using valuation techniques with significant unobservable inputs which are classified as Level 3 under the fair value hierarchy as defined in HKFRS 13, "Fair Value Measurement".

Under income capitalisation approach, investment properties of which the fair value is determined using the income capitalisation approach, the assessment is conducted on the basis of capitalisation of net incomes with due allowance for outgoings and reversionary income potential. The fair value measurement is positively correlated to the market rental and inversely correlated to the market yields.

本銀行須以監管儲備形式維持除香港財務報告準則所需以外之最低減值撥備。維持該監管儲備(儲備計及澳門商業銀行及大新銀行(中國))乃為符合香港銀行業條例及以審慎監管為目的之本地監管規定。該監管儲備規限可派發予股東之儲備金額。監管儲備之變動須與香港金管局進行諮詢,並直接於權益儲備內調撥。

於2022年12月31日,本銀行已指定438,460,000港元 (2021年:432,194,000港元)之金額作為監管儲備先抵 銷其綜合一般儲備,餘額再從本銀行之綜合保留盈利中 指定。

#### Note:

The Bank is required to maintain minimum impairment provisions in excess of those required under HKFRS in the form of regulatory reserve. The regulatory reserve, which also covers BCM and DSB China, is maintained to satisfy the provisions of the Hong Kong Banking Ordinance and local regulatory requirements for prudential supervision purposes. The regulatory reserve restricts the amount of reserves which can be distributed to shareholders. Movements in the regulatory reserve are made directly through equity reserve and in consultation with the HKMA.

As at 31 December 2022, the Bank has earmarked a regulatory reserve of HK\$438,466,000 (2021: HK\$432,194,000) first against the consolidated general reserve; and for any excess amount, the balance is earmarked against the consolidated retained earnings of the Bank.

The incentive options were granted in accordance with the terms and conditions of the respective DSBG and DSFH schemes. The exercise prices per incentive option were concluded by the NRC on behalf of the respective Boards of DSBG and DSFH on the basis no less exacting than the requirement set out in Rule 17.03(E) of the Rules Governing the Listing of Securities on the SEHK and were determined as no less than the highest of (i) the closing price of DSBG's/DSFH's shares traded on the SEHK on the date of grant; and (ii) the average closing price of DSBG's/DSFH's shares traded on the SEHK for the five business days immediately preceding the date of grant.

The rights granted under the respective schemes shall be exercisable upon vesting in 5 equal tranches commencing from the first anniversary of the date of grant. Subject to the satisfaction of performance appraisal factors, the grantees may exercise their vested options. No shares of DSBG or DSFH will be issued to the grantees of the options under the schemes which are essentially deferred cash incentive schemes linked to the performance of the grantees and the share price of DSBG and DSFH.

#### (d) International claims

The information of international claims discloses exposures to foreign counterparties on which the ultimate risk lies, and is derived according to the location of the counterparties after taking into account any transfer of risk. In general, transfer of risk from one country to another is recognised if the claims against a counterparty are guaranteed by another party in a different country or if the claims are on an overseas branch of a bank whose head office is located in a different country. Only regions constituting 10% or more of the aggregate international claims after taking into account any recognised risk transfer are disclosed.

#### 客戶墊款的減值準備(「預期信用損失」)

請參閱綜合財務報表附註4(甲) 我們了解並評估了管理層針對預期 及附註20。

信用損失的內部控制和評估流程。

於2022年12月31日, 貴集團 就客戶墊款計提減值準備港幣 1,636,402千元。

減值準備的釐定涉及複雜的方法 及重大管理層判斷。此外,從新 冠肺炎疫情中恢復的程度和速度 以及其他宏觀經濟狀況均會影響 估計減值準備時的固有風險和估 計不確定性。

我們評估了重大錯報的固有風險, 包括考慮估計的不確定性程度和其 他固有風險因素的水平,如所用估 計模型的複雜性,重大管理層判斷 和假設的主觀性,以及管理層偏向 的影響的敏感性。

我們對以下方面的關鍵內部控制進 行了測試:

就預期信用損失計量所作的關鍵 判斷及估計如下:

- 預期信用損失模型方法的 適用性和關鍵計量參數及 假設的適當性;
- 釐定信用風險顯著增加或 違約的標準;
- 宏觀經濟預測的釐定,及 經濟場景和權重的應用;
- 第三階段客戶貸款及墊款 的預計未來現金流量;及
- 應用管理層疊加的適當性。

- 預期信用損失模型方法的選 擇,重大管理層判斷的釐定和 批准(例如階段、宏觀經濟的 預測及其相關概率加權),以 及應用管理層疊加的適當性;
- 對已發生信用減值的客戶墊款 作出的及時識別、評估及報
- 根據借款人的財務資訊、抵押 品的估值及其他有關貸款收回 的可得信息,對第三階段客戶 墊款在一系列可能情景和權重 下得到的預計未來現金流量;
- 在減值模型中使用的關鍵數據 輸入值。

#### How our audit addressed the Key Audit Matter

#### Impairment allowances ("ECL") on advances to customers

Refer to notes 4(a) and 20 to the consolidated financial statements.

As at 31 December 2022, the Group recorded impairment allowances of HK\$1,636,402 thousand in respect of its advances to customers.

The determination of the impairment allowances involves complex methodologies and significant management judgement. In addition, the extent and pace of recovery from COVID-19 and other current macro-economic conditions have impacted the inherent risk and estimation uncertainty involved in estimating impairment allowances

Key judgements and estimates in respect of the measurement of ECL include:

- Applicability of ECL model methodologies, and appropriateness of key measurement parameters and assumptions;
- Criteria for determining whether or not there was a significant increase in credit risk ("SICR"), or a default;
- Determination of macro-economic forecasts, and the application of economic scenarios and weightings;
- The estimated future cash flows for loans and advances to customers in stage 3; and
- Appropriateness of management overlay applied.

We understood and evaluated management's internal controls and assessment process for the measurement of impairment allowances on advances to customers.

We assessed the inherent risk of material misstatement by considering the degree of estimation uncertainty and level of other inherent risk factors such as the complexity of estimation models used, the subjectivity of significant management judgements and assumptions, and susceptibility to management bias.

We tested the key internal controls over:

- Selection of ECL model methodologies, determination and approval of significant management judgements such as staging and macro-economic forecasts and their related probability weightings, and appropriateness of management overlay applied;
- Timely identification, assessment and reporting of credit impaired advances to customers:
- Estimated future cash flows with respect to advances to customers in stage 3 under a range of possible scenarios and their weightings based on financial information of borrowers, collateral valuations and information on other available sources of recovery:
- Input of key data used in the impairment models

How our audit addressed the Key Audit Matter

#### Impairment allowances ("ECL") on advances to customers (Continued)

Impairment allowances on advances to customers is an audit focus due to the material balance of the Group's impairment allowances on advances to customers and high inherent . risk given the uncertainty of estimates, adoption of complex models, involvement of significant management judgements and assumptions and use of numerous parameters and data inputs in such measurement.

In addition to testing the key controls, we have also performed the following substantive procedures:

- We involved our credit risk experts in evaluating the model methodologies for ECL measurement including significant management judgements and assumptions. We also assessed the supportability of the management overlay applied;
- On sampling basis, we assessed the appropriateness of the internal credit ratings, management's judgements used in determining significant increases in credit risk and identification of default and creditimpaired advances to customers based on the borrower financial and non-financial information and other external evidence provided by management;
- We evaluated management's selection of macro-economic forecasts, economic scenarios and weightings assigned. We assessed the reasonableness of the macroeconomic forecasts by comparing them to available public information, taking into account the latest developments of COVID-19 and other current macro-economic conditions;
- For a sample of advances to customers in Stage 3, we assessed the reasonableness of key management judgements and estimates to the ECL calculation such as estimated future cash flow from borrowers, latest valuation of collateral, range of scenarios and scenarios weightings.
- We checked and evaluated the financial statements disclosures in relation to the measurement of impairment allowances on advances to customers.

Based on the procedures performed, we considered that the models, significant judgements and assumptions, as well as relevant data and key parameters used by management in measuring impairment allowances on advances to customers were supported by available evidence.

#### 對聯營公司投資-重慶銀行的可收回金額

及附註23。

貴集團對於其聯營公司投資一 重慶銀行乃按權益法核算。於 年終累計計提減值準備港幣 4,675,000千元後, 貴集團於 司投資達港幣2,159,290千元。

該項投資賬面值的總額(扣除減 值準備前)高於重慶銀行的市場 價值。管理層據此認為該項投資 存在減值跡象。因此,管理層執 行了減值評估,其結論為投資於 重慶銀行的可收回金額低於其賬 面值總額,從而導致減值準備。 可收回金額是以貼現現金流量模 型計算之使用價值的估計值計 景。

我們確定投資於重慶銀行的可收 回金額為關鍵審計事項,是由於 對投資於重慶銀行的可收回金額 • 的估計存在高度不確定性,尤其 是估計投資於重慶銀行產生的未 來現金流量及任何未來出售收益 和釐定折現率。固有風險被視為 重大風險,是由於管理層在作出 估計時使用的判斷和假設存在主 • 觀性。

請參閱綜合財務報表附註4(丁) 我們了解並評估了管理層對投資於 重慶銀行的可收回金額計量實施的 内部控制及評估流程。

我們評估了重大錯報的固有風險, 包括考慮估計的不確定性程度和其 2022年12月31日持有之聯營公 他固有風險因素的水平,如所用估 計模型的複雜性,重大管理層判斷 和假設的主觀性,以及管理層偏向 的影響的敏感性。

# **KEY AUDIT MATTERS (Continued)**

#### **Key Audit Matter**

#### How our audit addressed the Key Audit Matter

#### Recoverable amount of the Investment in an associate, Bank of Chongqing ("BOCQ")

Refer to notes 4(d) and 23 to the consolidated financial statements.

The Group's investment in BOCQ is accounted for as an associate, using the equity method. The Group carried the investment in BOCQ of HK\$2,159,290 thousand at 31 December 2022, after making a cumulative provision for impairment of HK\$4,675,000 thousand as at year end.

The gross carrying amount of the investment (prior to impairment allowances) was higher than the market value of BOCQ. This is considered as an indicator of impairment. Therefore, management performed an impairment assessment and concluded that the recoverable amount of the investment in BOCQ was lower than its gross carrying amount, leading to an impairment allowance. The recoverable amount was measured as value-inuse ("VIU") estimate calculated by discounted cash flow model.

The recoverable amount of the investment in BOCQ is an audit focus as it is subject to a high degree of estimation uncertainty, particularly in estimating future cashflows arising from holding the investment in BOCQ and any future disposal proceeds and in determining the discount rate. The inherent risk is considered significant due to the subjectivity involved in management judgements and assumptions used in developing the estimate.

We understood and evaluated management's internal controls and assessment process for the measurement of recoverable amount of the investment in BOCQ.

We assessed the inherent risk of material misstatement by considering the degree of estimation uncertainty and level of other inherent risk factors such as the complexity of estimation models used, the subjectivity of significant management judgements and assumptions, and susceptibility to management bias.

We have performed the following procedures:

- We involved valuation experts in assessing the appropriateness of the valuation model used by the management and the mathematical accuracy of the calculations;
- We assessed the reasonableness of key assumptions and inputs used by the management based on relevant supporting evidence and our knowledge of the business and industry;
- We performed scenario analysis and developed our range of VIU estimates, by using independent inputs and assumptions, and compared with management's estimates;
- We obtained representations from the Group that assumptions used were consistent with information currently available to the Group;
- We checked and evaluated the financial statements disclosures in relation to the measurement of recoverable amount of the Group's investment in BOCQ.

Based on the procedures performed, we considered that the recoverable amount of the investment in BOCQ were supported by available evidence.

#### **Key Audit Matter**

How our audit addressed the Key Audit Matter

#### Recognition of the fee and commission income from the early termination of the Hong Kong Distribution Agreement ('HKDA')

Refer to notes 4(f) and 8 to the consolidated financial statements

On 8 July 2022, Dah Sing Financial Holdings Limited and Dah Sing Banking Group Limited, the ultimate holding company and immediate holding company of the Bank, announced that the Bank issued a notice to terminate the Hong Kong Distribution Agreement (the "HKDA") between the Bank and Tahoe Life Insurance Company Limited ("Tahoe Life") and Tahoe Services Limited with effect from 8 July 2022.

Under the HKDA, the Bank was appointed by Tahoe Life as its non-exclusive insurance agent for distribution of life insurance products in Hong Kong and Tahoe Life as the Bank's exclusive supplier of life insurance products in Hong Kong for its retail customers for a period of 15 years. The Bank received an upfront payment of HK\$1.972.000 thousand in 2017 and Tahoe Life agreed to pay ten equal annual payments of HK\$52,800 thousand to the Bank in the first 10 vears, of which five have been received by the Bank as at 31 December 2022.

Prior to the termination of the HKDA, the accounting treatment for the payments received were recognised as receipt in advance and were recognised as fee and commission income over the contract term. Following the termination of the HKDA, with the involvement of an external legal counsel appointed by the Group, management of the Group are of the view that the HKDA was validly and effectively terminated on 8 July 2022 and the upfront payment of HK\$1,972,000 thousand and the five annual payments of HK\$52,800 thousand received are non-refundable. Therefore, management of the Group concluded that the revenue recognition criteria under HKFRS 15 are met and recognised the remaining unamortised portion of the receipt in advance prior to the termination of the HKDA as fee and commission income in the consolidated income statement for the year ended 31 December 2022. Accordingly, a fee and commission income of HK\$1,394,149 thousand was recognised in relation to the early termination of the HKDA.

The recognition of the fee and commission income from the early termination of the HKDA is an audit focus due to the significance of the balance and the involvement of significant management judgements in evaluating whether the revenue recognition criteria are met, this includes determining the validity of the termination of the HKDA and the refundability of the payments received by the Bank.

We understood and evaluated management's assessment for the recognition of the fee and commission income from the early termination of the HKDA.

We assessed the inherent risk of material misstatement by considering the subjectivity of significant management judgements and assumptions, and susceptibility to management

- We obtained understanding of the HKDA matters through our review of the terms and conditions set out in the HKDA, review of the correspondences with the Group's external legal counsel and discussions with management and the Group's external legal counsel;
- We obtained management's assessment for the recognition of fee and commission income from the early termination of the HKDA, and evaluated management judgements involved in their assessment and accounting policies applied;
- We obtained written opinions from the Group's external legal counsel and discussed with the Group's external legal counsel their analysis and views as to the validity of the termination of the HKDA and the nonrefundability of the payments received by the Bank. We evaluated whether the analysis supported the relevant judgements made by management with the assistance of our internal legal expert;
- We assessed the competency, capabilities, and objectivity of the Group's external legal counsel: and
- We checked management's calculation schedule of the fee and commission income from early termination of the HKDA recognised during the year.

Based on the procedures performed, we considered the judgements made by management of the Group in relation to the recognition of the fee and commission income from early termination of the HKDA were supported by the evidence

The Audit Committee is responsible for overseeing the Group's financial reporting process.

# 核數師就審計綜合財務報表承擔的責任

我們的目標,是對綜合財務報表整體是否不存在 由於欺詐或錯誤而導致的重大錯誤陳述取得合理 保證,並出具包括我們意見的核數師報告。我們 僅按照香港《公司條例》第405條向 閣下(作為整 體)報告我們的意見,除此之外本報告別無其他目 的。我們不會就本報告的內容向任何其他人士負 上或承擔任何責任。合理保證是高水準的保證 中不能保證按照《香港審計準則》進行的審計,在 某一重大錯誤陳述存在時總能發現。錯誤陳述 不 以由欺詐或錯誤引起,如果合理預期它們單獨或 滙總起來可能影響綜合財務報表使用者依賴綜合 財務報表所作出的經濟決定,則有關的錯誤陳述 可被視作重大。

在根據《香港審計準則》進行審計的過程中,我們運用了專業判斷,保持了專業懷疑態度。我們亦:

- 識別和評估由於欺詐或錯誤而導致綜合財務 報表存在重大錯誤陳述的風險,設計及執行 審計程式以應對這些風險,以及獲取充足和 適當的審計憑證,作為我們意見的基礎。由 於欺詐可能涉及串謀、偽造、蓄意遺漏、虚 假陳述,或淩駕於內部控制之上,因此未能 發現因欺詐而導致的重大錯誤陳述的風險高 於未能發現因錯誤而導致的重大錯誤陳述的 風險。
- 了解與審計相關的內部控制,以設計適當的 審計程式,但目的並非對 貴集團內部控制 的有效性發表意見。
- 評價董事所採用會計政策的恰當性及作出會 計估計和相關披露的合理性。

# AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. We report our opinion solely to you, as a body, in accordance with Section 405 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the
  consolidated financial statements, whether due to fraud or error,
  design and perform audit procedures responsive to those risks,
  and obtain audit evidence that is sufficient and appropriate
  to provide a basis for our opinion. The risk of not detecting a
  material misstatement resulting from fraud is higher than for
  one resulting from error, as fraud may involve collusion, forgery,
  intentional omissions, misrepresentations, or the override of
  internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

#### 核數師就審計綜合財務報表承擔的責任(續)

- 對董事採用持續經營會計基礎的恰當性作出結論。根據所獲取的審計憑證,確定是否存在與事項或情況有關的重大不確定性,從而可能導致對 貴集團的持續經營能力產生重大疑慮。如果我們認為存在重大不確定性,則有必要在核數師報告中提請使用者注意綜合財務報表中的相關披露。假若有關的披露不足,則我們應當發表非無保留意見。我們的結論是基於核數師報告日止所取得的審計憑證。然而,未來事項或情況可能導致 貴集團不能持續經營。
- 評價綜合財務報表的整體列報方式、結構和 內容,包括披露,以及綜合財務報表是否中 肯反映交易和事項。
- 就 貴集團內實體或業務活動的財務資訊獲取充足、適當的審計憑證,以便對綜合財務報表發表意見。我們負責 貴集團審計的方向、監督和執行。我們為審計意見承擔全部責任。

除其他事項外,我們與審計委員會溝通了計劃的 審計範圍、時間安排、重大審計發現等,包括我 們在審計中識別出內部控制的任何重大缺陷。

我們還向審計委員會提交聲明,説明我們已符合 有關獨立性的相關專業道德要求,並與他們溝通 有可能合理地被認為會影響我們獨立性的所有關 係和其他事項,以及在適用的情況下,用以消除 對獨立性產生威脅的行動或採取的防範措施。

# AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

### 核數師就審計綜合財務報表承擔的責任(續)

從與審計委員會溝通的事項中,我們確定哪些事項對本期綜合財務報表的審計最為重要,因而構成關鍵審計事項。我們在核數師報告中描述這些事項,除非法律法規不允許公開披露這些事項,或在極端罕見的情況下,如果合理預期在我們報告中溝通某事項造成的負面後果超過產生的公眾利益,我們決定不應在報告中溝通該事項。

出具本獨立核數師報告的審計項目合夥人是林虹。

# AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS (Continued)

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Lam Hung.
