Guaranteed portion	
a. Guaranteed Cash Value from policy inception	b. Regular distribution of Guaranteed Cash Coupon starts at the end of the 7th policy year
Starting from policy inception, Guaranteed Cash Value is payable upon policy maturity, surrender, partial surrender, payment of Mental Incapacity Benefit ¹ (if applicable) or death of the Designated Insured ²	Starting from the end date of the 7 th policy year, we will distribute a Guaranteed Cash Coupon and, thereafter, in every policy year, distribute the Guaranteed Cash Coupon at the end date of that policy year to the Policy Owner. The distributed Guaranteed Cash Coupon will remain unchanged throughout your benefit term, even amid market fluctuations. Guaranteed Cash Coupon is equal to 0.8% of Notional Amount. It is determined at the end of the relevant policy year based on the Notional Amount at that time. Before Guaranteed Cash Coupon is paid, it will be used to settle any outstanding loans and any applicable interest against the policy. The default payment option of the Guaranteed Cash Coupon will be "Accumulation", however, you may choose to accumulate or cash out the Guaranteed Cash Coupon. If you choose to leave the Guaranteed Cash Coupon with Sun Life HK, it will be accumulated with a non-guaranteed interest rate of 3.50% p.a. ³ .

Remarks:

3. Lock-in your policy values to enjoy greater certainty over potential gains

Your policy has a Value Lock-in Account. Each time you exercise this option, you can choose a Lock-in Percentage of 10%-50% of the sum of Guaranteed Cash Value, cash value of Reversionary Bonus and cash value of Terminal Bonus of your policy.

Details you should know

- You can exercise the Value Lock-in Option once per policy year, starting from the 10th policy anniversary.
- You can exercise this option up to a maximum aggregate Lock-in Percentage of 50%.
- Once your request of exercising the Value Lock-in Option is approved, it cannot be withdrawn or changed.
- This option cannot be exercised if the policy is assigned or has any outstanding loan.
- Each time you exercise the Value Lock-in Option, your policy's Notional Amount, Guaranteed Cash Value, non-guaranteed bonuses (i.e. Reversionary Bonus and Terminal Bonus) and total premium due and paid will be proportionally reduced according to the Lock-in Percentage by triggering partial surrender. Afterwards, the future declaration of non-guaranteed bonuses (i.e. Reversionary Bonus and Terminal Bonus) and Guaranteed Cash Coupon to be distributed will be reduced accordingly.
- The Notional Amount after the Value Lock-in Option is exercised cannot be less than the minimum amount requirement.

Important information

Bonus Philosophy

Life insurance involves the transfer of risk from an individual to a life insurer, and the pooling of risks across large groups of policies. With participating insurance, a portion of these risks is borne by the policyholders or shared between the policyholders and the insurer. In return, policyholders may receive policyholder bonuses in the form of reversionary/terminal/special bonuses. These bonuses are not guaranteed and can vary from year to year.

In general, bonuses on these policies reflect the experience, over time, of the group to which they belong. Bonuses will typically vary based on the performance of a number of factors, with the investment return*, including the impact of asset defaults and investment expenses, normally being the main determinant of bonus performance. Other factors^ include, but are not limited to, claims experience, taxes, expenses and policyholder persistency experience.

Favourable and unfavourable experience may be smoothed out over time to provide more stable bonuses to policyholders. For products with a terminal/special bonus feature, adjustments to terminal/special bonus scales pass through experience normally with less smoothing applied.

The bonus allocation process seeks to achieve reasonable equity among groups of policies and among policies issued at different times, to the extent practicable. Upon declaration of reversionary bonus or payout of terminal/special bonus to policyholders, shareholders will also be entitled to a share of the distribution.

At least annually, the Board of Directors of Sun Life Hong Kong Limited determines the amount of bonus to be declared or paid to participating policyholders. This determination is based on the advice of Sun Life Hong Kong Limited's appointed actuary, who applies accepted actuarial principles and practices. Management of participating business is also governed by Sun Life Hong Kong Limited's internal policies, as well as advice by the internal Par Governance Committee.

* Investment return includes investment income and changes in asset value of the backing portfolio. Performance of the investment return is affected by interest earnings and other market risk factors including, but not limited to, interest rate or credit spread movements, credit events, price fluctuations in non-fixed income assets, and foreign exchange fluctuations. Please see the Investment Philosophy for more details on the investment policies, objectives and strategy in relation to the investments of the backing portfolio.

^ Claims experience represents the experience of mortality and morbidity. Persistency experience includes policy lapse/maturity and partial surrender experience; and the corresponding impact on investments. The expense factor includes maintenance expenses only, where it is charged to the participating fund at the level Sun Life Hong Kong Limited expects to be required over the foreseeable future. Policyholders will share the impact of any changes, over time, to the expected level of expenses required for the then foreseeable future. Any deviations on a year-to-year basis of the expenses actually incurred from the then expected level required, will be absorbed by the shareholders.

Please refer to Sun Life Hong Kong Limited's website (www.sunlife.com.hk/dividendhistory_eng) for bonuses fulfillment ratios details.

Investment Philosophy (Policies, Objectives and Strategy)

The investment strategy supporting this product is intended to optimize long-term value to the policyholders with a suitable level of risk; and to achieve the main objective of delivering a fair chance of meeting the illustrated non-guaranteed benefits in addition to the guaranteed benefits.

The assets supporting the investment strategy span a diversified range of fixed income assets such as sovereign bonds, corporate bonds and corporate loans; as well as non-fixed income assets which are equity-like investments and may include public equities, private equities, derivatives and so on. The credit portfolio largely invests in investment grade fixed income instruments. A small quantity of below investment grade assets may be present in the portfolio due to unexpected credit rating downgrades. However, exposure to below investment grade assets is controlled by the credit risk limits and investment policies.

The current long-term target mix for the assets supporting this product is shown below.

Asset Class	Target Asset Mix
Fixed Income Assets	80%-100%
Non-Fixed Income Assets [#]	0%-20%

[#] Non-Fixed Income Assets are mainly underlying equity-like investments and derivatives to drive the return of total assets.

Although majority of the assets are invested in fixed income, return from fixed income assets will be used to purchase the equity-like investments and derivatives such that the return of the total underlying assets will be mainly driven by investment exposure to volatile non-fixed income assets instead. This means that the effective exposure to non-fixed income assets will be materially higher than the range as indicated above.

However, we adopt an active investment strategy to mitigate some of the inherent market risks and therefore provide more stable return to the policyholders. The investment strategy aims to limit the downside risk of the equity-like investments but can also limit upside potential during strong market periods.

Please note that when interest rates vary, the returns generated by the fixed income assets may increase or decrease and thus change the exposure to equity-like investment and derivatives. The overall performance of underlying assets will therefore be affected.

We invest globally to achieve geographical diversification benefits and intend to have a higher relative allocation in the US and Asia-Pacific. Geographical diversification results in a more stable investment return over the long term. The actual asset mix percentages and geographical allocation may fluctuate depending on market conditions, diversification needs and economic outlook.

We may pool the investment returns with other long term insurance products with similar plan features (excluding investment linked assurance schemes and pension schemes) to optimize the investment performance and the return will subsequently be allocated with reference to the target asset mix of each product.

If the currency of the assets is not in the same currency as the underlying policies, appropriate hedging instruments (where available) is generally used to minimise impacts from fluctuating foreign exchange rates. Derivatives may be used to hedge against currency risks but are not intended to bring the risk profile beyond established risk tolerances.

The investment strategy noted above may be subject to change, subject to a rigorous internal review and approval process. We will notify the policyholders upon any material changes.

Key Product Risks

1. Early surrender risk

Please note that if you terminate this policy early, you may receive an amount significantly less than the single premium paid towards your policy.

2. Exchange rate and currency risk

Any transaction involving conversion between policy currency and other currencies would be exposed to foreign exchange risks such as the fluctuation in exchange rate against policy currency.

3. Investment risk

This basic plan may make certain portion of its investment in non-fixed income assets. Returns of non-fixed income assets are generally more volatile than fixed income assets. You should note the long-term target mix for the assets supporting this basic plan as disclosed in this brochure, which will affect the bonus on this basic plan. The savings component of this basic plan is subject to risks and the actual return may be lower than projected return.

4. Inflation risk

The cost of living in the future is likely to be higher than it is today due to inflation, so the benefit may be insufficient to meet your needs even if we meet our contractual obligation. Hence, you should consider the impact of inflation when you plan the benefit.

5. Credit risk

This basic plan is an insurance policy issued by Sun Life Hong Kong Limited and your benefits are subject to the paying ability of Sun Life Hong Kong Limited. In the event that we become insolvent and unable to meet the contractual obligation under the policy, you may lose all or part of your premiums paid and benefits.

6. Policy termination

We have the right to terminate the basic plan upon the earliest of the following:

- accumulated policy loans and interest exceeds the sum of Guaranteed Cash Value and the amount of accumulated Guaranteed Cash Coupon and interest (if any) and the amount in the Value Lock-in Account (if any);
- the Original Policy before Split will be terminated when the Policy Split Option is exercised;

c. the Designated Insured passes away;

d. the basic plan reaches its maturity; or

e. the Mental Incapacity Benefit is paid under the basic plan that triggers the termination of the policy.

Important Notes

This brochure is for reference only and it does not contain the full terms and benefits of the policy. Please refer to a sample Policy Document for details including but not limited to definitions of capitalized terms, full terms and conditions of coverage and exclusions.

1. Levy on insurance premium

Effective from January 1, 2018, all policy owners are required to pay a levy on their insurance premium for all new and inforce policies collected by the Insurance Authority through insurance companies. The applicable levy rate will be determined by reference to the policy date or policy anniversary date. For levy details, please visit our website at or Insurance Authority's website at www.ia.org.hk.

2. Cancellation right

If you are not fully satisfied with your policy, you have the right to cancel your policy within the cooling-off period and obtain a refund of any premium and levy paid. By giving us a written request, your policy will then be cancelled and any premium and levy paid will be refunded, provided that: (1) your written request for cancellation must be signed by you and received directly by our office (G/F, Cheung Kei Center Tower B, No. 18 Hung Luen Road, Hunghom, Kowloon) or through email (hk_csd@sunlife.com) within 21 calendar days immediately following the day of delivery of the policy or the cooling-off notice informing you or your representative about the availability of the policy and the expiry date of the cooling-off period, whichever is earlier, and (2) no refund of any premium and levy paid can be made if any payment from Sun Life HK under the policy has been made prior to the request for cancellation. After the expiration of the cooling-off period, if you cancel the policy before the end of the policy term, the projected total cash value/surrender value (if any) may be less than the total premium you have paid.

Important Notes from the Insurance Agent of Dah Sing Bank, Limited:

This brochure is for reference only and does not contain the full terms and benefits of the policy. Please refer to a sample Policy Document for details including but not limited to definitions of capitalized terms, full terms and conditions of coverage and exclusions.

1. Premium related cost

Part of the premiums paid will be used to pay for the insurance and related costs.

2. Limited liquidity

The plan is designed for a long-term purpose. The liquidity of an insurance policy is limited. You are strongly advised to reserve adequate liquid assets for emergencies. For any surrender/ withdrawal especially at the early stage upon policy inception, you may receive an amount considerably less than the premiums you paid.

3. Suicide clause

If the Designated Insured under this Policy dies by committing suicide, whether sane or insane, within one year after the Issue Date, the effective date of any reinstatement of this Policy, the Effective Date of the Change of Coverage or the Effective Date of the Change of Insured (if applicable), whichever is the latest, then we will not pay the Death Benefit as set out in the Benefit Provisions of the Basic Plan.

Instead, Sun Life Hong Kong Limited will pay to the beneficiary pursuant to the Beneficiary and Trust Declaration provision an amount equal to:

- the single premium paid under your policy from the issue date or the effective date of any reinstatement of this policy (as the case may be); less
- any amount which has been paid under this policy; less
- any loans with interest at rates determined by Sun Life Hong Kong Limited at Sun Life Hong Kong Limited's sole discretion.

4. Policy loan

While the policy is in effect, on written request of the policy owner, Sun Life Hong Kong Limited will loan an amount up to a specified percentage, subject to the administration rules as determined by Sun Life Hong Kong Limited from time to time, of the sum of the Guaranteed Cash Value, any amount of the accumulated Guaranteed Cash Coupon with interest and any amount in the Value Lock-in Account (less interest on this or any other loan calculated to the next Policy Anniversary). The policy will be the security for the loan.

The amount available for a loan will be reduced by the amount of any existing loans which remain unpaid, together with interest. Interest is charged on loans at rates determined by Sun Life Hong Kong Limited at Sun Life Hong Kong Limited's sole discretion. Interest accrues daily and is payable yearly. Unpaid interest will be added to the loan. The unpaid loans and interest will be deducted from the payment or proceeds (if any) under the policy.

When loans and interest exceed the sum of Guaranteed Cash Value, any amount of the accumulated Guaranteed Cash Coupon with interest and any amount in the Value Lock-in Account, the policy will be terminated automatically. Please refer to the Policy Document for details.

5. NOT a bank savings plan

The plan is a life insurance plan with savings elements. It is NOT a bank deposit nor a bank savings plan with free life insurance coverage. Your contribution is a payment of life insurance premiums to Sun Life Hong Kong Limited but NOT a banking transaction like placement of savings deposit, withdrawal from a bank or fund transfer.

6. Non-guaranteed benefits

Reversionary Bonus and Terminal Bonus are non-guaranteed and are determined in accordance with the rules set out by Sun Life Hong Kong Limited from time to time. The Reversionary Bonus and Terminal Bonus may vary based on the performance of a number of experience factors, with the investment return normally being the main determinant. Other factors include, but not limited to, claim experience, policy expenses, taxes, and policy owner termination experience.

The case study in this brochure are for illustrative purposes only. The projected figures and returns stated in the case study are based on Sun Life Hong Kong Limited's bonus scales determined under current assumed investment return and are not guaranteed. The actual amounts of relevant return(s) payable may be higher or lower than the illustrated figures. Under some circumstances, the actual amounts may be zero.

Fulfillment ratios are for reference only, dividend/bonus history is not an indicator of future declaration/ performance of the participating products. Please refer to Sun Life Hong Kong Limited's website www.sunlife.com.hk/dividendhistory_eng for bonuses fulfillment ratios details.
